

Aleksandr Savrasov

Family-
a cosmic unit

The second book from the series
"KNOWLEDGE OF PRISTINE ORIGINS"

Publisher "HAPPY WORLD"
city of Volgograd
2015

Today, due to the degradation of society, with the loss of the Divine purpose of men and women lost are the knowledge of the co-creation and birth of a human being, that is, a child.

A child can be born and develop in the likeness of God, but similarly he can be born and develop as an energy that can not create. And the energy, which is not able to create, is only one thing – a destructive energy. Third energy, for example, contemplative, that is, not belonging to neither the creative, nor the destructive, does not exist. Therefore, we pay great attention to the importance of families.

This book can be useful to the people who begin to think in a new way, that is, the readers of Vladimir Megre's books "Ringing Cedars of Russia", in order to create their own harmonious lives.

Spirits of Dolmens

A light will be shed on the mystery of being,
The light will be shed, and the star will sing,
She sings about the eternal and the simple,
She sings of the gentle and the holy,
About the fact, that soon
A new day will be born,
About that fact, that the evil
Will dissolve, like a shadow,
And the bright dawn will not dim,
It - is a harbinger of a joyful day,
It will reveal the mystery of being.
The Universe itself is telling this to us,
That love will always live,
Where the two are together - you and me!

PART 1

FAMILY – IT IS SACRED

The Earth and the Universe are inseparable, this is a single whole. The Earth and its related planets can be called a family. This complex of planets creates a favorable world for man. And the man himself, so that he could exist normally and develop, continue the Kin - must create a family. This guarantees the eternal life of people, their series of incarnations.

A family is a cosmic unit. It guarantees the joyful existence of the Universe, its development, emergence of life on other planets like the earth, the emergence of new planets suitable for a happy life. The family should be complete - a man, a woman, their children. This guarantees a healthy energy of infinity.

If a woman gives birth to a child, but does not create a family - such an energy is sick, destructive, it guarantees only one thing - further degradation and extinction of humanity. This energy is incomplete, and therefore finite. After all, a man and a woman are two halves of one whole. Therefore, a FAMILY – IT IS SACRED.

Treat the creation of a family as an event of a cosmic meaning.

Mothers who are alone today, who could not create a family or save it - there is no fault of yours in this and you should not blame yourself for this, for your world is so mired in illusion, and Divine understanding of life is lost, other life priorities and goals led humanity to what you have now. But this can not continue, so we are now explaining, what is a family, so that future generations can fix everything. We, the souls of people living in dolmens, are keeping this knowledge and returning love to the families, and therefore a happy, full life of people filled with joy.

We especially want to note, what important role the man plays in creating and maintaining is happy family. Be responsible in search of a half, and if you have connected with someone, then take care of

her, do not leave a woman alone. Women are flowers, and men are the sun that warms them and gives them their love, and the flowers from this become even more beautiful, and, in turn, return the love, and this - is harmony.

A family - it is not a marriage, it is a new star, it is a new song, a song of a beautiful happy eternity.

He who destroys a family, he destroys the Universe, he becomes a harmful energy, which hinders the happiness of the planets. Protect your family, because it is a particle of the whole cosmos. The world is created for happiness and for the sake of the happiness your families. A family can only be happy in a Space of Love, in its domain. For your orchards and you - it is the universal joy of the Earth, the guarantee of its eternal life.

One who created a family fulfills God's plan, lives by the Divine arrangement of people's lives. He who created a family pleases God. Trees, flowers, grass spread their seeds and with that they continue their life. He who created a family can continue his Kin, because the family provides the proper upbringing of children. We are talking about the Vedic upbringing in the Vedic family, because such an upbringing and such a culture is inherent to our people - in this is our happy life, in this is the correct formation of a happy and fulfilling life of our children.

People should live in joy and sing their joyful songs.

A young vedruss came out on a wide slope,
A young vedruss came out with blue eyes,
The heart is enveloped with bliss,
The song sounds in the heart,
In the heart a bright fire ignites.
Yesterday he fell in love with a beauty and a dream,
He is passionately in love with one girl,
Her youthful laughter has alarmed him,
And in the soul strings suddenly rang.

The energy of Love is always directed to the young men and women who have such upbringing and such knowledge. Such people dream about this, they will create a space where Love can live – their kin's domain.

How the Vedruss Formulated a happy life of their children

Formation began while still in the womb of the mother, when the child felt his parents living in love and joy. With him, they talked mentally and invited him into their earthly world, they told how good it was here. At this time, the spirit of the child was formed, and it was formulated by his happy, caring, knowledgeable father. When the child was born, he was sang a lullaby song, which talked about the girl (or the boy) - his half.

A man was born - the pinnacle of Divine wisdom, one for whom the great harmony of the whole Universe. And the Universe listened and all the planets, what does this man want, what will he do, how he will he build his life. And each planet dreamed of how it could serve man, so that his life was happy and joyful, and only of this dreamed each star.

Through the songs, holidays, deeds and words formulated the life of the future creator of life on earth and the whole cosmos, that is, Man. Vedruss children since childhood communicated with wildlife. They were explained the meaning of herbs, flowers, bushes and trees, bugs, birds and animals.

A lullaby song that was sung to a child had already imprinted on the subconscious, formed a meeting with his half, formed a complete understanding of a harmoniously arranged world.

In the future, the Vedruss grew up, and the succession of holidays in which he participated, the meaning of which he was explained, did their job. He did not depend on the opinions of people, on their advices. He himself deeply and comprehensively understood his life,

his essence, the essence of the Earth and the cosmos, the stages of being, what is enclosed in harmony, and therefore happiness and truth, what he will do and how he will build his life.

Growing up and becoming a boy (or a girl), reaching a mature age, when he could create a family - by this time the young man had all the knowledge that a man must possess and the girl possessed all the knowledge that a woman must possess. And when the two halves united, they possessed full knowledge for a joint happy life, since their parents from the maternal womb formed a complete, happy, harmonious, conscious life.

Such a life was formed also by the cosmic planets. This was possible, only living in the kin's domains - the Space of Love. Namely of this habitat the descendants of Vedruss were deprived, creating an image of urban life and mocking, and belittling life on Earth. Namely this is the biggest and most terrible trick of certain forces. Today, many people speak and write about Vedic knowledge. But is it possible to express on paper the psycho-emotion, moral, spiritually-intellectual part of a man? It is impossible. But it is precisely this is the most important asset of the Vedruss, namely this is the foundation of Vedic knowledge. Hence the mysterious Russian soul - namely the soul, not the mind. A pure soul, a soul, that carries goodness in itself, warmth - it does not have cold and cynical thirst for profit, vile lies, ignorance, selfishness. The true goodness of the soul - it IS the Vedic knowledge, for it is harmony.

FAMILY - A COSMIC UNIT

A family - it is a cosmic unit of measurement.

A Space of Love can only be created by a Man. And similarly he can ignore it because of the lack of understanding of the significance of such a Space or just from not knowing of this at all. And his life will pass in vain. And with his thought he will strive to go to

different worlds and there seek his happiness, but he will not find it, because it can not be there. After all, Father the Creator gave man the right to create his own happy dream, that is, to materialize it in reality.

So, true happiness and a song of all of his soul he will not find in foreign worlds. Therefore the Vedruss said: "With you, beautiful Goddess, I could co-create a Space of Love for ages. " And the Goddess answered: "I am ready to help you in this great co-creation." This is the culture of the life of pristine origins. This is the cosmic essence and wisdom of being and the continuation of Kin, and therefore eternity of tomorrow.

Why is it said: "a Space of Love for ages"? It means the birth of children. That space does not die with the death of its creators, but continues to live in their children. Therefore, the family was created for co-creations of the happy ones, born in the joy of the Divine. In the city, the energy of Love can not live. For the city - it is the most sophisticated trick of the dark ones for the destruction of souls of men, for the separation of man and God-Creator, for God - is in the living nature. A city and a Space of Love are incompatible.

Why did love grow in Vedruss families Argoz speaks (Knowledge of Love)

To say that it was stronger, would be wrong, for initially it was all given away. But the relationship between people became more affectionate with each other each year, and this really is the truth. The hearts filled with a bright bliss. In the course of time, the two lovers soared, cherished by the energy of Love and carried away to the planet "Happiness", of course, in the energetic sense, and not in the physical, that is, their souls rejoice every day. And this song of their hearts became more graceful, harmonious and pure.

The longer the two halves lived together, the more beautiful

became their relationship. Why? The answer is simple - it consists of the purity of their thoughts and of the clarity of thought, when they created the family. They lived in their kin's domains, where a living Love can feel comfortable, for it is Divine nature. Only in such conditions can she live and express herself.

THE IMAGE OF A MAN

What is a man? It is the creator, it is the hope and support of the harmonious development of the Universe, this is new songs and new stars, their beautiful future and the joy from the fact, that they are able to fully fulfill their purpose. A man - it is a hope and support for his Kin, a man - it is stability, this is fortitude of the spirit, the joy of tomorrow, the energy of solidness and confidence. In short, a man - is a guarantor of stability. But to do all this, he must love his woman. And only because of this he becomes a creator.

A lonely man does not possess the real energy of the creator. When a man makes his woman happy, he makes the Universe happy.

THE IMAGE OF A WOMAN

The woman personifies boundless love, full acceptance of everything as it is. This is inherent to a woman's energy - to caress or to care for even not the very bright manifestations coming from people.

Therefore a woman - it is the center of the family, its warmth, its foundation. The male energy reaches out to that heat, warms up by it, protects it and provides it with everything necessary.

A woman should remember the inherent only to her importance, care for her energy, and not be proud of it, but fully understand her purpose.

Women, who do not conserve their energy, but are being lead by lust, doom themselves to extinction, their offsprings are not viable. Such children lose their sexual orientation at a subconscious level: men want to be women, women want to be men, their energies are ugly, as if mutated vegetables - except for harm they do not bring anything.

Today the role of the family, its cosmic meaning, with the help of a technocratic development and a false understanding of the essence of life, is lost. Women are lonely, they have to carry out man's work, and therefore to collect man's energy. This is very bad, it's a disaster. But this is your reality.

Try to create a family and take care of it as the most sacred. This is the real Vedic knowledge - to live according to the Creator's program.

* * *

A Russian woman, a Russian,
You simply live not very richly,
And on your thin shoulders
All of our Russia you have placed.
A Russian woman, a Russian,
In a simple cotton dress,
All the same more beautiful and lovely then you
There is no one on the whole Mother Earth.

You are bearing the burden too heavy for you,
You stand, but you do not slouch.
So what are you made of?
Maybe you're cut from stone?
No, you are not cut from stone,
But out of love for your Motherland,
And out of love for your little children,
You're made of simple songs.
A Russian woman, a Russian,
In a simple cotton dress

All the same more beautiful and lovely than you
There is no one else on the whole Mother Earth.

VIRGINITY OF VEDRUSS

Young men never met with young women for no reason. They were deliberately looking for their soul mate, they were approaching her through their thoughts, actions, through their heart, and only the love, that came to the Vedruss, put everything in its place.

Never will a Vedruss tell the one he loves: "Marry me. " For such a proposition has an end. Marry me, and then what? The thought is interrupted it is limited. By such an offer man forms not a happy eternity, but a short section of a life path. What will happen further, one can only guess. The planets do not understand the future path of these two people. The energy of Love is also in confusion: she, as a highly intelligent substance, striving for people's pure thoughts, in this case is in confusion. She does not know what will these two people do next, why they connect, what is their goal.

But when the Vedruss says: "With you, my beautiful Gods, I could co-create a Space of Love for ages", and the goddess replies: "I am ready to help you in this great co-creation" - in this case everything falls into place, such thought is infinite, it is eternal. These two people want to co-create a Space of Love for ages, their goal is beautiful, pure and aspires into eternity. Energy of Love and the cosmic planets will help such people in their deeds, desires and creations, because they understand, what they want. The kin's domain, which these two people will create for themselves and their children, will be the foundation of their happy life and eternal love. Over the years the love did not become weaker. In such a family, there was no fornication, it is even naive and laughable to talk about this.

In the pure heart love lives,
For her, everything is there from the beginning.
And the message comes from the Universe,
In the hands of a radiant star.

The man and the woman became one. Whole. The energy of Love and the Universe helped with this. Each of them represented the whole cosmos for each other.

CREATION OF MAN - CONSCIOUS CONCEPTION

Urguz speaks

(Knowledge: how to give birth and bring up children)

Conception – it is a living creation, that is, co-creation of life, intelligent life, a creative one. Man – it is the one, for whom the Earth was created. Man can create similar planets. Man can create and improve the Universe.

When you conceive a physical person, you are conceiving a creative thought similar to God. It depends on the parent, if the creator will be born or a man who has not known his abilities.

A man must fully understand who he is, what he is responsible for, that he, the man, is responsible for the energy of Love in the family more than a woman. He takes care of himself and of his thought, so that there is no intimacy with the other women, and he would not allow this even in his thought. The thought and body are faithful to one, the one with which he connected his own life. The strength of the family depends on it. Let the man preserve his virginity, innocence, purity before the face of the whole Universe. The Universe, all the planets, having seen, how the man aspires towards his purity, will send him their love, and multiply it by the

infinity of kindness. Such a man, truly sincere in the name of the creation of a family and the creation of his children, it is impossible for the energies and forces of destruction to lead him on a false path, that is, to destroy the family. Namely the man preserves himself for his woman.

A man is the support for everything. If a man wants a strong, happy family, then it will be so. And the woman - is a helper in everything. She can not create without the man, she does not need to - she is a helper, but at the same time the inspiration for her man. In the name of his beloved woman, in the name of her purity, smile, a ringing laughter and radiant eyes he can do anything. And in this the energy of Love is the helper for the both of them. And without Love even the blade of grass is sad. In order for the energy of Love to come to you, you must protect your virginity and purity thoughts in the name of cosmic energy, which is called family.

A woman should also be virgin. She should have only one man - her husband, both physically and in thoughts. Such a family is a complete cosmic life affirming complex, a living unit of measurement. Beware of corrupt men and women, and those, who live in lust, and wish to nourish their animal desire. In the full sense, they can not be considered a human being. They are like Judas, who betrayed Jesus Christ. They betray their God the Father, betray his purity, his faithfulness, his self-sacrifice, he gave away the love to all the people, without remnant. Perhaps, my words will seem to be rude, but there is no rudeness here. They show a bad example to the others. Their life is like death - they live, deceiving themselves, and sell the soul to everyone, who buys. And God and the creative life can return to such people, but also may not. To change bodies - is unsafe, such deeds destroy the cosmos. The planets burn up such energy so that the Earth would not be destroyed by a flood or fire. Prepare your children for the creation of a family once and forever. After all, the creation of a family - it is also a conception, a

conception of a harmonious energy, viable, aspiring into the future, into eternity, for children are born. Therefore the conception of a child should be treated very seriously.

This is how you should prepare yourself for conception:

first of all, send your thought to your Kin - not to a star, but simply mentally turn to your ancestors and explain to them that you want to create a child in the likeness of God, a creative energy. Both a man and a woman, should address the Kin like this, each to his own Kin.

To do this, you need to go into an orchard planted by your ancestors, and tell this orchard about it. And if you do not have such an orchard, go to the forest, tell the trees about yourself, they will put in a good word for you in the Universe. Such a link is weaker, but it is also effective. And if the energy of Love came to you, you have created a family and you have a Space of Love, that is, a kin's domain, you can conceive - to perform the song of your bodies and souls.

**FORMATION BY THE FATHER OF THE CHILD'S SPIRIT
IN THE MOTHER'S WOMB
Anastasia speaks (Knowledge: how to give birth to
happy, Divine children)**

Coming to THE Earth, the soul must receive a certain amount of spirit. The spirit comes from or is formulated by the father. It is necessary, so as to get the energies of this time.

The soul - it is you, this is your psycho-emotional part of eternity of being. This is that energetic knot, which never dies if it lives by God's rules.

Spirit - it is character, will, aspiration, fulfillment of one's purpose. Without this energy, man can not do anything, move towards his goal. The soul by itself can not do anything, and the spirit by itself

can not do anything.

The soul, strengthened by the spirit, becomes life affirming and can stand up for itself, be soft, tough. It is - the energy that can live in almost any conditions and not only live, but also act.

Spirit - it is what is formed when the soul still lives in the mother. How the spirit will be formed, such the soul will live, that is, that person who will be born. On the spirit directly depends a person's life, his actions, deeds, views, aspirations.

The soul, while incarnating, is freed from the energies of the spirit, that is why it needs to form new ones. And this is what the father does, and this is correct, because in different epochs there are different energies.

A spirit is formed for a given person's life.

The father of the child possesses the now living energies on Earth (relations between people, customs, characters).

Through himself, the father can transmit his energies, his spirit to the child, if his is next to his pregnant wife.

Parents should remember, that they are always three, not two, talk to the child, do not show aggression in relation to anyone, etc.

From the man-father must proceed a firm, confident energy of a happy, joyful life, the kindness of that world in which parents live. Namely from the father, because only a father can form a spirit, the mother grows and forms the body.

On the father depends the future character of the child, his kindness or aggressiveness. The father forms those energies, which distinguish a man from an animal. The higher the intellect of the father, the closer he is to God, the higher the spirit and the spiritual qualities of his child.

If a man plants trees, and grows flowers and wishes people goodness and health, then the children are similar to him, in them forms a similar installation at the level of emotion, that is the spirit. If the father is a money-grubber, an adulterer, vanity-full, cynical, a liar, then similar is formed in his children.

No matter how pure the mother, still the children will be more similar to the father.

If the father simply says, what he wants to see in his future child, it will not work. The spirit is formed by the attitude of the father towards his wife, towards his family and his Kin, attitude towards nature. All this will come through in the conversation of the father and the mother. Love of the parents towards each other, their tender feelings for each other and towards the baby, which is in the tummy, will form namely such a spirit: gentle, kind, sincere, aspiring towards the energy of love, as the most important energy for building his own happy life.

If the parents will talk and live with this – how to sell some goods for a large sum of money, how to outwit others, how to become richer materially, even if such parents love each other, but in this case a cold, cynical, capable of lying spirit of man will form, and he will look at the energy of Love as an addition, but the main thing in his life will be material prosperity. Such children, growing up, gradually pass to the path of the material self-sufficiency, in this life, in everything they will seek the benefits of their activities, and they will never waste time on the planting of flowers just to admire them, because it is unproductive.

And even if they do plant flowers, then it will be for sale, because it will bring profit.

The spirit of the future child mainly forms from his father – eighty percent, sometimes ninety.

And in this is the role of a man as the true creator, who invests God into man, that is, the Divine thought. The one, who invests the energy of calculation and benefit, he invests the energy of destruction, and this is not from God.

Any outside man can form the spirit of the child. All men surrounding the pregnant woman, form the spirit and invest something of their own.

If the man is not near at all, the spirit is not formed at all, it is

formed by that world, that environment where the mother lives. This formation is weak, and such a person does not have his own opinion, desire, he uses someone else's, easily obeys, and due to this has the opportunity to live.

The thought of a woman, memories of a man or men will also shape the spirit of the child.

All feelings, aspirations, are transmitted to the child by themselves as an energy. You can regulate your emotions (annoyance, aggression, resentment). Sing happy, life affirming songs.

THE BIRTH OF A TRUE MAN

Anastasia Speaks (Knowledge: how to give birth to happy, Divine children)

The most ideal for the birth of a child – it is a kin's domain, where, as it were, a person passes from one matter into a womb of another. A father meets him, who was waiting for him, overflowing with love to his child.

For such a person the life will be many times more happy than the one who was born outside the kin's domain. In such a person all the springs of life or life keys (now called chakras) will be open. Such a person is always a creator, a creator of Divine aspirations, all the springs of life in him open at the same time, and therefore all the bodies develop equally.

If in a person first opens the lower chakras (the opening always begins with the lower, red chakra), then some may not open at all, and also their opening can be influenced. There are people, who can close, prevent the opening of spiritual chakras, through which the energy of Love comes, bright energies.

Not all people have all the chakras open. Only using Vedic knowledge of the birth of man and being in a kin's domain (in the Space of Love) – for such a man all chakras open simultaneously, in

another case it is impossible to guarantee the opening of all the chakras. The chakras always open beginning from those which are responsible for the physical body of a person, for his flesh - these are the three lower chakras.

If the person is alive, then at least one chakra (red) is always open. Those born in the kin's domain - namely these children will return to the Earth the Creator's thought, namely their energy is capable of taking in bright energies. Such influence has on man a birth in a kin's domain, using the Vedic knowledge.

Vedic knowledge of the birth of a child:

It is a meeting of two halves, they are joined by the energy of Love, the halves are virgin, none of them were ever married, the creation of the Space of Love - their kin's domain, the wedding rite, correct conception and namely in the kin's domain, bearing of child all nine months, the father is next to the child, who forms the spirit of the child, correct birth in a kin'd domain, the child is received by the father, overcrowded with love, breast feeding of the baby and the lullaby is sung, growing up, he will be crawling, do not interrupt the thought of the child at this time.

Why there are problems at childbirth?

When conception comes from lustful joy, and not from the fact that you want to create a child, and this is not a desirable conception, but this is a surprise and a grief for a woman - from here the consequences (caesarean section, pain, bleeding, etc.)

**A MOTHER MILK -
THE MATERIALIZED WISDOM OF GOD
Urguz speaks (Knowledge: how to give birth and bring up
children)**

Through the milk of the mother, the Universe nourishes the child. And only the Universe can give man all the inherent qualities for the children of God. It is the mother's milk that possesses such energies, and the most important energy - is the mother, that is, Man, the crown of Divine creation. Namely the mother, possesses in full the all cosmic energies and the one possessing the knowledge of breastfeeding of a child, can invest in her child all the wisdom of cosmic existence. Such a person becomes like God. In such a feeding a big role is played by the strength of the mother's thought, the ability to concentrate, so as not to lose the thought while feeding. What should be the correct thought of the mother - it's too early to talk about this, the energies, inherent to the meaning of human life have not yet changed, the Earth is sick, and the human body is unhealthy, the thought is undeveloped the person today is separated from the Universe by his misunderstanding and fear of the unknown. For today's man the Universe is something alien, cold, large and incomprehensible. When you will be breast feeding the child, if it's a son - dream about how he aspires to the stars, he aspires to understand the Universe and to love, he aspires to continue his Kin, to see his sons and daughters with him. For this, he, singing the song, reflecting the world, will be able to find his half, and the energy of Love will come to them. What else can the mother think about when she has given everything to her son! If it is a daughter - dream about how the daughter warms up the stars with her soul, and her thought meets her beloved and together they will create their beautiful and pure dreams.

A mother's milk

- it is s a storehouse of Divine aspirations, its desires and abilities. A mother's milk - it is the incarnate wisdom of God, it is a drink, possessing tremendous power. The person, nourished on kindness, purity, by a sincerely loving mother, has an outstanding health, a visionary mind and achieves the set goals. His physical body, even if it does not seem to be the strongest, in fact is full of endurance and is very tenacious. But such milk can have only that woman who really wanted to give birth to a Man, and not because of the fact that it is necessary, because you are a woman. Such milk never be had a mother who did not create a family, on the contrary, her milk is sick, poisoned by the grief of loneliness, in her heart has no energy of Love. Such a woman - is a representative of a sick energy, because a healthy energy is guaranteed by a family. Therefore, children who grew up outside the family are representatives of sick, unviable energy, they are not able to create a cosmic unit, that is a family. To such children I recommend to study in the school «Happiness». Those Divine energies that this school possesses, and the high-grade children will help such a child compensate for the missing energy. And on the condition of the correct interpretation of his life, that is, what energy he represents, such a person will be able to create a happy family. If a child is fed on mixtures, not by his mother's milk, such a person is also inferior, he is deprived of full-fledged, cosmic energies, he possesses particles of such energies. This is not enough, to be called a person to be a creator. If a child grows up in a Divine environment, and the parents created the right conditions for his up bringing, that is, they do not interrupt his thought, his games, then in about a year and a half the child will begin to refuse the breast, for mother's milk gives the universal energies and knowledge, on the conditions that the mother consciously lives in a kin's domain, among nature. This knowledge and energies the child receives from herbs, from

flowers, from insects, from animals - from everything, that is created by God. When he inhales the air, with the scents of the forest, he breathes in the knowledge of pristine origins, he breathes the thoughts of God. Therefore, a child, like an energy, is filled with cosmic essence, and his mother's milk is no longer needed. In urban conditions, the child can take a long time to give up the breast, because he has no other source for an energetic acquaintance with the Universe. If the child grows up in nature, he himself will be drawn to berries, fruits, vegetables. Gradually women will understand all the responsibility and importance of such knowledge of feeding their child with breast milk. This knowledge has been preserved by your ancestors. Today this is called dolmens - in them live people's souls, who preserved all of this. Gradually, with time, you will understand what importance for your further harmonious lives have such knowledge. We are already opening ourselves up to you and introducing you to our knowledge, so far only on the surface level, that such knowledge exists and it is very necessary to humanity. But thanks to the school "Happiness" in two or three generations your offsprings will be able to use and apply this knowledge in their life. Without them, the descendants of Vedruss will never become a true Vedruss. In several generations the speed and strength of thought, dew to such schools "Happiness", will reach such a state when people can use our knowledge.

Today you need to give the most meaning to the conception and birth of your children. Studying in such schools, these children will differ from you in the correct understanding of the world order, the depth of knowledge of the essence of being, such as if you were not taught anything. Your children will be able to separate the grain from the darnel (*a Russian expression*). Thanks to them, life on Earth will be changing cardinally. They will truly understand the whole idiocy and the fatality of the technocratic world. They will be able to explain and show the real path of a harmonious life.

But the movement towards this you will already need to start today. You, living today people, get out from under the control of money, out of control of destructive laws, begin with your thought to create the foundation for more viable, pure energies. And for this you should create your own kin's domains. These domains will take you to a new level of understanding of a life order, new interchange of energies between people, new attitude towards their lives, a new attitude towards those, who live close to you. You will begin to understand, what is spiritual closeness among people, how to save these relationships and strengthen them. For this, a new space is needed, which belongs to everyone, it will teach you something new, which has long been missing in man: "I am doing this for my neighbors to be happy." And your neighbors will do everything for you to be well, not to defend your house, not to create thieves and bandits with your own thought, but to live openly with a pure soul. With this you will be creating a place and attracting new energy, forgotten and lost due to degradation. In the city such energies will never be revived. Learn to care about the neighbors. Everything, you do on your plot of land - first think how not to harm the neighbor. Such a relationship is harmonious. If you want to have a dog, first think about how the dog's barking, especially at night, will not allow your neighbors to live in harmony. And in general, if you think about yourself and about the neighbors, as your friends, the dog really becomes a harmful animal.

THE SIGNIFICANCE OF THE LULLABY SONG

Urguz speaks

(Knowledge: how to give birth and bring up children)

Through the lullaby the Universe builds a happy life of a given person. A long time ago, great importance was given to the information embedded in the singing in the songs. A song - it is a

special rhythm, which the Universe makes. This rhythm was used by people before. Their words were like a song - not so many words, but the meaning is deep. Therefore, today namely the song has a special energy, in its strength it is different from the speech. Today, to communicate with the Creator, use the song-singing, not necessarily in rhyme. When you communicate with the Universe by yourselves or through nature (trees, forest), use a song tune. You can pronounce the words to your child before going to bed and so shape his life, and the stronger, the clearer they are, the more clearly forms the happy life of a child through singing.

The lullaby of pristine origins for a boy

The night comes,
day is resting,
the stars in the sky are lit,
And falls asleep, everything falls asleep,
Sleep, my little son, sleep.

On those stars
With your barefeet,
You will run with your living foot,
The Song of the Universe
With an imperishable soul,
A song of Love you'll sing.

That song
Will joyfully flow,
To each planet
Goodness they'll give,
And all the planets
will begin to swirl
In the eternity tenderly and easy.
And to that holiday
A Universal holiday
tender flower will come.

This little flower,
Is a little living light -
A little girl sings her song.

That is a half,
Your little half
Meet her, my son.
There's no bigger happiness
For the Universe,
Rock love in your heart.

Here two halves have met -
My son and that little girl,
Two sparks,
Two halves
Are always together now.

Your aspirations -
Is the song of creations
Happiness, love and spring,
There is no boundary
For the songs to sparkle
Your home- is all of Creation.

The meaning of a family was fully understood by the Vedrus, and namely its cosmic significance, and not only the earthly one. Let's talk about the son. A mother or a grandmother sings a lullaby song to a boy, it talks about a girl with which he will meet. Through a lullaby song, a boy finds out about the girl - about his half, as the most important thing in his life. Such comes together and is formulated in the thought of the subconscious of the child, that he should be worthy of this girl. When the child will begin to understand, begin to talk, this information, instilled into the child, can be used in his good upbringing. For example, when the child does not listen - a mother can say, that this girl is looking at you and is very upset that you are misbehaving. And for the son to be a strong and intelligent, a mother tells him that you must prepare for a meeting with your girl, for this you must become physically strong, developed, and says to him, that your dad can teach you everything that he knows himself. The child aspires to such cognition, he does not resist the wishes of his parents, but on the contrary, in everything seeks to help, and hence to receive knowledge that he must possess for meeting with his girl. In the future, he growing up, the boy tends to prepare as best as possible for meeting with this girl, and at about 18-20 years old a young man is truly really ready to make his girl a Goddess. And this girl was taught exactly the same way, and she learned all the knowledge that a young lady must possess, and therefore she, in turn, is capable and worthy to become a Goddess. Love that came to such people, illuminated their lives with great joy, which today people are deprived of, because they aspire their children to other goals and create disharmony in the souls of people. In simple terms, the aspiration towards meeting ones half (girl or boy) is the decisive and a guaranteeing factor, that men became

invincible warriors, and their wives stood next to their husbands, and their hearts performed the universal song of Love, without fear they accepted death, it was more terrible to lose your loved one.

Today it is difficult for you to understand this phenomenon, but your children, brought up in a new way, will be able to realize this. And to return this great knowledge is the very first task of you - descendants of Vedruss.

The lullaby song of pristine origins for a girl

My dear daughter,
Gentle light of the sun,
Everything comes to a still.
The grasses are sleeping,
The joyful wind is asleep,

Sleep came to visit you.
A dream will lead you

Into an amazing world,
Hold your hand out to it,
Love will meet you

With a radiant song -
A boy on the milky way.

This path is built
So that you would meet

Your own half there.
Your little half,

God's little particle,
Warm it up with your heart.
The wonderful stars
With an exultant song
To joy and happiness
Will lead you

You will be forever,
You will be together

Live on the beautiful Earth.

Your wonderful
Children will be born

Again the Universe rejoices,
Each little star
With a charming song
Aspires towards your actions.

What you need, to keep love in the family

You need a kin's domain – it is Divine nature, where everything blooms and sweet smells, and does not rot and decompose. In Divine nature, love can live and be happy – this is the first thing, the second – that two people aspired towards each other to create a Vedic family, for the birth of Divine children, for their happy life, for the continuation of the Kin. This is their pure thoughts, and namely these pure thoughts will ensure that the energy of Love never leave such people, because for her it is an ideal habitat, another environment does not exist for a harmonious life.

* * *

Future humanity can live normally and be harmonious, only by creating families. Each adult man and adult woman should create a family. Only under such condition created are the energies, which guaranty eternity, and humanity harmoniously fits into the life of the Universe. Therefore, the family truly is a cosmic unit.

The family can not be divided into a husband and a wife, that is, a man and a woman, since the family is an independent energy that occupies its rightful place in the cosmos.

Today, people get married and divorce very easily.

But the time has come of a correct understanding of such a phenomenon, as a family, and a responsible attitude towards creation of a family.

The energy of love can guarantee a strong family. To do this, create conditions, where she can live, that is, a kin's domain.

HAPPINESS AND MATERIAL WELFARE

Happiness is associated with the energy of Love. Namely in

love a person can be truly happy.

What is material well-being? This is when the man almost does not spend his thought on where to get food, clothes, what kind of house he has, whether or not there is a car and so on. And the real well-being of a person, namely the material one, is the place where he lives. If a person lives in his or her own orchard, then such a person has complete material well-being, because the Space of Love - is that place where the physical manifested world and the energetic, the un-manifested one, harmoniously coexist and help each other.

Namely in the Space of Love a man is capable of not succumbing to such negative energy as the thirst for profit, the desire to possess some things, for example, money in large numbers, and devote to it all his life. But similarly he will not live a half-starved life, just to sing songs for his beloved. Because a kin's domain, that is, the Space of Love, makes a person's life harmonious and happy. That is why we recommend that you start creating your kin's domain with planting of trees, flowers, shrubs, because an orchard is more important for a person as a harmonious individual than the house, even if it is large and beautiful.

THE POWER OF HUMAN THOUGHT

The power of human thought depends directly on its speed. Therefore, the first and most important thing that was done by the dark priests - is they began to slow down the speed of people's thoughts.

This is the first. The second thing they did was - with cunning they rid man of his kin's domain, communion with God's world, the space, in which the energy of Love can live. They began to build densely populated villages, where a person can only suffer, and his thought is aimed at one thing: how to survive, that is, earn money. Man

ceases to be a creator, he just takes care of the body, animals do the same thing.

Ever since childhood, the Vedruss used their thought. Adults never interrupted a small child engaged in some kind of activity. With this they did not interrupt his thought. The longer a person can think about something, the better, the longer is the spiral of his mental energy.

Why is it today, in order to reach some kind of a planet, people build rockets? Only because their thought is very short. Due to this, people can not even imagine, that you can get to a distant planet in some other way. Precisely because the thought is not developed, a technocratic development began.

What is degradation? It is undeveloped, very short spiral of mental energy. Today's man has an undeveloped thought. Because of this, he thinks about himself as a spiritual, rational being, he calls himself the king of nature, but this - is his ignorance, selfishness. We are not blaming you for anything, but we want to highlight the way, by which you can return to the Divine origins.

In fact, a person's thought is his most important tool. And mainly think must man, and not engage in the monotonous daily physical labor. Physical labor can not ennoble a person. Man - is the son of God. What can be nobler and purer? Man possesses the energy of creativity, but creativity must be aimed at creating harmony, increasing kindness.

WHAT CAN YOUR CHILDREN DO

Your children - are your future, and their happiness depends on you. You truly can form a happy joyful life of the future generation.

Let's imagine that the children were brought up on the Vedruss principles. Such a person at his eighteen years understands, who he

is and what he is capable of, what is kindness, what is ignorance and anger, he feels and understands nature: that it is alive and created for his good, for his harmonious and quiet life; the animal world also helps the person. Such a person understands in full what great importance for him and for the whole Earth as a whole, has clean water, clean air, that the Earth – it is a living planet, it needs to be loved and protected, it completely depends on the life of man. Such a young man or a woman will never support the technocratic path – they will immediately see all the absurdity and the impasse of such a way, for it destroys clean air, pure water, wildlife and Earth itself. They can not be deceived and can not be led aside with money, promises of the material wealth, such people have different understanding of life, they have other priorities. They are fully responsible for their actions they are aware of the fact that namely they – are the children of God, that they are the creators of their lives and the lives of future generations. They grew up in the environment, where the energy of truth lives, true purity of thoughts, and therefore they themselves carry in themselves the energy of truth, there is simply no places for lies in them. They are representatives of another energy – a pure, creative energy. They are missing completely the most destructive energy for today – the energy of selfishness, that is, the thirst for profit and the thirst for glory.

VISITING SCHOOL "HAPPINESS"

The story of a man

It was a sunny spring day. I drove up on a car to the sign on which it was written: "School "Happiness" – the Space of Love. " I saw an amazing picture. Buildings could be seen in the distance, and everywhere else, where the eye could see, there was nature, there grew and bloomed bushes and fruit trees. They were still

small, they grew so actively, with such zeal and desire, that it was felt at a distance. What a fragrant air! It was full of fragrances, ethers of all of this blossoming splendor. And the joyful singing of birds - it seemed that here they sing with a special inspiration. I left the car on the road, not driving on the territory of the school. I've heard about this school many times, but was not able to come here, somehow there was not enough time. Business did not give rest for a minute - if it's not one thing, it's the other, all the time some kind of issues came up. And the constant problem with money, it seems - that I'll just make a little extra money and 'll take care of my personal life, but I could not, always something would come up and I had to start again. But today I just went ahead and came here, not knowing why, just really wanted to see for myself, what is this - the school "Happiness".

I walked through the blooming orchards. I was already explained earlier that the orchards, groves, meadows, the river, the air, the sky, at night - this is the school itself, where the children are just enjoying life, because the first, the most important condition - is that the person be happy. Because only in this state he will be able to realize himself as a creator, in this state he will be able to answer any question that he will be asked. In this school children are not only taught something, but mainly they are asked questions. The child thinks over the question, and the speed of his thought at this time is growing, it increases its speed all the time, and the wildlife, Created by God, is that natural teacher, which has the most complete knowledge, you need only to learn how to take it in. That's what my friends had tolled me.

Ahead I saw a group of children, with them an adult woman and I went to them. We met and talked. Her name was Miloslava. Her pure eyes, a pleasant female voice and the energy coming from her emanated such tenderness, such appeasement and warmth, that somehow I felt easy and joyful, I wanted to speak poetry, I wanted to do something good for all people. This condition I have

had only in childhood, when my mother stroked my head and said something good. I suddenly remembered all this very vividly, and I even smelled. I stood before this woman, and inside of me began to wake up such feeling, as if I was guilty of something, I was doing something wrong, was not aspiring towards the right things, I wanted to fix everything. I really wanted, that this woman, whom I saw for the first time, would forgive me, but for what? I could not understand what was happening to me. I was brought out of the stupor by cheerful cries of children. They were running around this fabulous meadow with a noisy band, and some retired and looked at something in the grass.

I asked Miloslava:

- How can one study here? Children just run around, playing and do not learn anything, it's not very clear somehow.

In an ordinary school, children sit at their desks, listen to the teachers, you only try and break the discipline - at once the parents will be called by the principle that your child is not disciplined, poorly educated, does not know how to behave, that the parents correct their child. And the parents make corrections, and physical ones too, including with a belt. For what? A little person, a child simply can not physically sit out all lesson without movement. And why should he? What villain came up with such a cruel training for children? But how, after all, here, in living nature, do children learn?

And Miloslav began to tell me:

- These children are here first year. They have not learned yet to hear their thought, they are only getting used to it.

All the same, communication with living nature is already taking place. They are chasing butterflies right now, but they do not want to catch them, but simply to play with them. They have already learned to treat all life with kindness, and all nature responds to them with kindness. Children feel it, they feel good here, they're at home. They already know how to talk with herbs, with flowers, they

know that all nature is alive and can hear them. Later, they will hear every blade of grass, bug – this will happen later, they themselves will not notice, how it will happen. They will just communicate and that's it, they will talk just like you and me. Right now they will play enough, and will get tired, I will ask a question. The question can be any kind, for example, I'll ask why the daisies have white petals, but the inside is yellow? They will think about it, they will disperse in the meadow.

Their thoughts will not be interfered by anything, and the time here is not limited, some of them will forget about the question and carry on with something else of their own, it is not important, the main thing is that the thought is working. Then they will come to me and will tell, why the flower is just like that. A dispute may ensue. But it will quickly go out, because everyone has his own answer, and this answer will be correct. Everything is created by God – the people, and nature. A man living in harmony and love with the world around him, is always right.

These children are mostly from our village, but there are also ones from the orphanage, they were taken to a few families, they live there like family now.

Children do not quarrel among themselves, because there is no reason for quarrels. Everything belongs to everyone here. We have such a rule: the child will never ask for something for himself, he, on the contrary, will offer others something that he has. This is instilled in the very way of our life, our internal routine. A child growing up into an adult, will not be limited, or be a greedy money-grubber. He will become the creator to whom the whole world belongs, and he is responsible for it before his parents, before himself, before his children. He will fully realize that it is he who is responsible for a joyful, calm, happy life of his own children. Not some man who might not like his children, namely he himself. Also, students here study general educational subjects. This knowledge is also still needed.

I thanked Miloslava for the interesting story, said goodbye and went to the barely audible sound of the song.

Coming closer, I discerned that the children were singing it. The voices were unusually high, strong. Two girls sang, and the chorus was singing along. I sat down in the grass and listened. I guess, the songs were written by the children themselves, because I've never heard them before. The song was over, they began to talk about something. There were no adults near by evidently, no one directed them, no one showed them how you need to sing, perform songs - they did it themselves, adjusting each other. There were no disputes between them, in their relations was friendliness, they felt themselves joyfully and easy, it was clear that they really liked to singing. Here they stood in a semicircle, and the song poured. It really poured, I felt it physically. It turned my mind, my heart beat faster. There was such a state, as if I was washing in a bunya, but my soul, not my body. Something heavy and foul started to leave me. Even a lump came up to the throat. Gradually, all this began to pass, and finally I felt relieved. And the song still poured, it strengthened its energy. Extraordinary tenderness swept my heart. I could not stand it any longer, I stood up on my knees and tears streamed from my eyes. But it was not tears of sorrow, they were tears of joyful renewal. I really wanted to sing along with these children, sing their songs about the Earth, about the sun, about the sky, about the stars. I felt, that something is happening to me, something very good, still did not understand what exactly, but already felt that I can not live like this anymore, as I have lived till now.

I rose to my feet, bowed low to these children and walked. But the energies that ravaged in me, were not allowing me to walk calmly, and I ran. I ran through the meadow and screamed: "I love you!" I did not understand who I loved, but I knew for sure that I love someone. Such feeling comes to people only when they really love. I "grew wings", because I no longer felt my legs, I just flew, hovered

over the ground. Then I fell into the grass, the nose was struck by the living smell of the earth, warm and strong. Before my eyes ran some insects, ants, a grasshopper chirped. He sat, looked at me and chirped, the grasshopper sang his song to me. Everyone here sings., where am I? No one is suffering in search for money, which are always lacking.

Who has so cruelly deceived me and forced me to suffer all of my life? I want to fix everything. Yes, I'm already many years old, but I still have my health. If I was deceived, deprived of happiness, life passed in some kind of frenzy, all the time in a hurrying somewhere, and there is never enough time, then now I can start a family and I want to have the same happy children. They will study in such a school, it is called - "Happiness." After all, there exists a woman who will agree to be my wife and give birth to me a child. I will create for her all the conditions, I will take care of her. I really want to take care for my family - that's what I want! And namely this is what I wanted all my life, I just could not understand this, because there was not enough time. But this children's song, what did it do to me? Everything has changed in me, I now clearly understood what I want - I want to create a happy family for the creation of happy, Divine children. I'm responsible for the lives of my children, what kind of life they will have - joyful or bitter. I, as a parent, am obliged, simply obliged to create worthy conditions for a worthy life of my children. Now I understand that this is - a kind domain, the space where Love lives, and they will learn in the school "Happiness".

My parents were deceived, they were convinced, what a blessing of a life it is in the city with its problems, and the only eternal thought of: where to earn money, because you have to pay for everything, there is nothing of your own, starting from housing and finishing with food. And I also lived in this illusory world, in the concrete city gloom, where there is no pure air even. And what is nature, created by God, that it is perfect for a quiet, measured,

healthy life of a person, I never thought about that. The city took away all my thoughts and strength. And now I'm a really happy person, I begin to live in a world created by God for Man – I am building my kin's domain.

What happens to children, if they don't move enough

When the child is sitting for half a day, without moving in the school, he has muscle atrophy, that is, physical inactivity. And this, in turn, is nothing more than, that the planets are not used by this person. They cease to positively influence those organs to which they are connected. After all, why is it said, that a person represents with himself the whole Universe? Because his bodies – both physical and energetic – are in constant contact with the cosmic planets. Your body can not be healthy if such contact is lost. When there is violence forced on the body, in school it is called discipline, there is a disconnect of the body and planets, man is devoid of universal energies. Consequently such person will become a biorobot, at least he has all the prerequisites for this.

Do not forbid the child to move, but do it such, that it was interesting for him to work with the thought, that is, to think, to dream, to make pictures in his head.

Movement – it is always life, a harmonious life, it is development, the growth of human thought-spiral.

Razvitie (in Russian development) *Raz* – is the man himself, *vitie* – the spiral of his thought, the thought moves in a spiral.

SONG OF THE HUMAN SOUL
Anastasia speaks
(Druid, who taught the Bards)

Initially, a person, by virtue of his energy, pronounced the words in a singsong. After all, everything living communicates with each other through a song, a melody inherent only to it.

Today, due to degradation, the energies have become more rigid and man began to speak abruptly, breaking off words and phrases. The song retains the viscosity of the word.

A song – it is a narrative or a short story in a certain rhythm. We recommend that people sing songs. Through the song it's easier for the Universe to hear you, through your melody it will understand – if you feel joyful or you have trouble.

It is through the song that a person easily connects with the forces of light, of goodness, of creativity. Professional singers, performers, that is, people who sing for money, they can not connect with the light, for they are self-serving. All depends on the thought of man.

If a person sings some songs during the day – only one condition: they should not be about woes, then that is separation, death, rejected love and so on, then man is in the dimension of the light forces. Thanks to this he feels well, it is easy on his soul.

Why is it harmful to always listen to someone else's performance, even if the songs are positive? Because you take in someone else's energy all the time, even if it's tender, but someone else's. Such a person can be compared with a flower, which grows in the shade. It is beautiful, but without the sun it can not blossom with a full, cosmic brilliance due to lack of life energy.

Every person – it is an individual, this is a cosmic individuality. namely your singing will highlight and strengthen your, only to you inherent cosmic energy.

Your subconscious will be cleansed of the alluvial, the alien. In fact,

it will be easier for you to decide your path in life.

Songs that you listen to or sing affect your life. Do not sing songs about parting, do not chase love out of your life, do not sing about trouble, grief. After all, with this you form your own woeful life.

But sing about the meeting, invite love in your life. With this you form your happy life.

Sing happy songs, because a song – it is your harmony.

How to learn to sing

Originally each person possesses the ability to sing.

Worse or better singing is from the power of a created image, from its vivid vision or its blurriness.

The song needs to be sung first silently, mentally imagining pictures, not uttering the words of the song aloud. And maintaining its rhythm, the motive (this is very important), to sing the song, without the voice. At first it will be difficult, but then you will get used to. Thanks to this, when you sing aloud, together with the voice pictures will be arising, that is, living images, created by your thought. If you work hard, the song will not be only heard by the ear, but also seen. For the complete transfer of the song the listeners always miss its vision, that is its image.

The voice for the performance of the song is not the most important thing, but it too must be trained. To do this, go to the forest and try to relax and connect with nature. To make it happened better, explain to the space – what you came here for, just say it and ask for help, then you will be helped by the trees, and the birds, and the breeze. Sit back and start to listen how the birds sing, leaves rustle, the stream rings. Living nature always sings, it always makes a song. Become this song yourself, try to hear the motif of the forest, the motif of this space, and start singing that song which you want to sing right now – it is your soul

singing your inner state. Each person has his own motive, his own rhythm. The same song different people will perform in their own way, it may be hardly noticeable, but this will always happen. Farther start singing yourself, imitating birds and other sounds of the forest that you will hear. And the way it will happen for you - this will be correct.

When you feel a strong desire to learn some song - get to it boldly. Thanks to your assiduity, the song will unite in itself the image created by your thought, the rhythm, inherent only to you, the voice, perfected in a living space. This is enough to get started. But this is not all. When a person reaches a higher awareness, and as an energy becomes more pure and harmonious - other opportunities open up before him, they are limitless.

PART 2

RUS'

*You are dressed in rags,
You are humiliated by criminals,
And many cold-bloodedly
Laugh right in your face.
But you preserve kindness
And you take care of beauty,
You know and you dream,
And carry purity to the world!*

My school years

In the village where I was born, there were several small libraries. Approximately at the age of ten I wanted to know about ancient Russia, how the Russians lived before, because I myself am

Russian, and I wanted to know very much about my ancestors, how they lived, what they thought, what they did, what kind of houses they had, in which places they inhabited the land, whether they had enemies with whom they fought and how they did it. But there was not such books about our ancient Rus'. I remember very well, with what desire and zeal I searched for such books, but did not find them. And could not find them, because they simply did not exist.

We studied in school ancient Greece, about the English feudal lords. I asked the teachers and adults: "Why there are no books about Rus? "I was told that there is no such books in the school curriculum, and in general they do not know anything: "Read what's there." They were Russian people, but for some reason they did not want to know how our ancestors lived earlier, before Christianity, what was there.

At school I studied badly. First, second and third grades we studies in the same room, and we had one teacher. So, she put me in a corner for the whole day, sometimes for a week. I came to school, but did not sit at the desk like all the children, but stood at the corner, because I misbehaved, I could not, like others, sit for 45 minutes without moving, because I was mobile, cheerful, but at school such children were considered hooligans, malicious violators of discipline, brought up badly and so on.

I understand very well now who are the ones that are badly brought up, the ones who had cold hearts and a certain hatred of children. But thanks to my cheerful attitude, vitality, they could not break and crush my spirit and soul. Because the school – it really is violence over man. School, of course, effected me, but not in as much as others.

In adulthood I began to use alcohol. Sometimes, I went into drinking bouts, but I always found in myself the power to stop, get out of this state and live further. In my soul there was a thirst for knowledge, to live, to be happy, but just what is it be happy – I did

not know, because at school they teach quite different things. It's good, that my father did not punish me for my poor academic performance at school, did not put fear on me, because there was enough of this fear, connected namely with the school.

My childhood was crippled, disfigured by the school.

And if I really needed this knowledge as the son of God, as a man, then I agree to it. But this knowledge is needed in order to disfigure the land, nature, your own self and everyone around you.

In general, when I received real knowledge, I felt it with me heart and soul. The first thing I did - I stopped drinking. I was so happy to live, the whole world opened up in front of me - my world, for which I answer. This is my homeland - Russia. It is my Russian people. And they live cheerlessly, in problems. And I saw, that all this is created by some artificial forces, because Russia - it is the richest country, and the our people are talented, hardworking and very kind.

But it is this people from time immemorial that enemies attacked to plunder and kill, to seize to slavery. What is it, why such hatred of my people? Now I understand why: because the Russians - it is the descendants of Vedruss, bearers of bright knowledge, and these knowledge are at the level of genes, genetic memory.

And now it's time to wake up my people, wake up their soul.

Without this, we can not go further. Namely our ancestors "fell asleep" a few thousand years ago, and now we, those living today, must get out of this "sleep", must break out of the captivity of the system. Now we already know what the system is and who created it, who it is that supports it and why. It talks about this in the series of books "Ringing Cedars of Russia" by Vladimir Megre.

I came to my homeland when I was forty four years old. I met my classmates. We talked a lot. It turned out that two-thirds of my class has already died, mostly from drinking, they drank themselves to death. I met two of my classmates. They were class honors, one of them even cried, if he received a "B", and not an "A" for some

subject. Now they were alcoholics, slept in the boiler rooms, faces in scars and bruises from fights. They very surprised that I did not become a drunk, that I looked good, that I have good clothes. They said: "You studied bad, you skipped school, you were a hooligan, but your'e doing well". And they could not understand. And the secret is simple – in some miraculous way my soul did not succumb to oppression, God had remained to live in it and his program.

I stopped drinking. I do not have time to think about drinking, so much to do. Time is a real treasure, I realized that you need to appreciate and cherish it.

All this happened to me when I managed to take off the "glasses", which the system put on me, that is, a school, a university, the parents deceived by the system and so on.

So, life was turned out to be so beautiful.

Once, while living in the city, I thought – why did God create such an agonizing life? Moreover, priests in the church say that you are slaves, that you are born in sin, that you must suffer, and all the time, pray over some sins.

Now I know, who my ancestors are, what kind of people I belong to. Now I know what needs to be done, how to act, to what aspire to. Now I know who were the ancient Greeks and who are Rusiches, that is the Vedruss. I know how my ancestors lived and what they did, a few thousand years ago. My childhood dream came true – I found out about their culture, and so I know how to live and what to do today. I do not need to pour into myself any more alcohol of grief and hopeless in order to forget myself from that empty and unbearable life of mine. Now I specifically know how to make my life happy, and a happy life of future generations.

I belong to a great people – people-creators. It is my people that could harmoniously live and govern in the harmony of the whole Universe. Only in no case should one elevate oneself over others and think that you are better than they are. In reality we need

to fully, truly, really deeply realize, what kind of responsibility lays on us. Namely responsibility – there is no place for pride and selfishness for the descendants of Vedruss. Namely the descendants of the Vedruss should show the other peoples a concrete, a materialized example of a happy life. Seeing, that you can live happily and peacefully, without wars and aggression, the whole of mankind will pass to such an understanding of life – that life is given to create the splendid and to admire the beauty. To do this, one must change life's priorities, to see the real, the divine values of our life.

It's no secret that there is a purposeful alcoholization of the Russian people. It could not be defeated in the open combat, now they act through alcohol, through drugs. All conditions are created for this purpose. And today, truly the whole nation is being alcoholized and is getting hooked on the needle of a drug-mania. I, as a person, who has experienced the influence of alcohol, understand very well, what a terrible potion it is. Now alcohol – it is the norm in our daily life, it has already entered the customs and habits of our people. Any holiday or vacation is associated with the use of alcohol, this became a tradition. We are told that Rus' always drank, that drinking for Russians – is a norm. But in fact, Rus' – it is a country of wise men, of creators. Our lands were flowed in orchards, our air has always been filled with aromas and nectars of flowers, and the culture life of our ancestors allowed them every day to be in a festive mood. And only deeply unhappy people want to get drunk to forget themselves. And we, those living, today must stop the alcoholization and drugging of Russia, and therefore we will do this. And do not let doubts in your thoughts. Thanks to the dolmens, I was able to lose the kabbalah of darkness, therefore others will be able to, they just need to be helped in removing the "dark glasses" of the age-old postulates, drop from yourself the lies and deceit of those who hate us. There is no need to be afraid, cowardice for Russia – is an alien energy. Greatness of

Russia – is in its kindness, purity of thought and deeds. And do not allow in yourself aggression, we will open our hearts all together for Love.

Such time has come – to LOVE. But first of all you need to become truly happy, because only the happy can create happiness. In that we will be helped by dolmens, these are our ancestors. Soon you will understand what dolmens are for us, those living today.

All the good people of the Earth, unite in one aspiration for the pure, the bright, the joyful! Only together we can revive our planet, and it will light up with the most delicate colors and begin to breathe the fragrances of our blooming orchards.

** * **

*Someone shouted: "Russia is weak,
The Russian spirit has long been not the same,
But Russia stands up, like the dawn,
Her woman's face is invincible.*

*This face is beautiful and pure,
Let this beauty shine!*

Who shouted there: "Russia is weak"?

Take back your words.

All, that is pure – can not be made dirty

The bold truth can not to drowned,

And Russia rises up, like the dawn,

The female face is beautiful and pure.

RUS' TWO THOUSAND YEARS AGO

RUS'. R – spoken Eternity, U – a flying cosmic energy, S – a force, a soft sign (') – soft, kind.

RUS' – eternal cosmic kind force.

There was such a state, and it is better to say – a territory on

which lived our ancestors the Vedruss, it was called Rus'. Rusiches lived calmly and happily. But about two thousand years ago foreigners started to aggressively and persistently attack them. They collected large troops and with an amazing persistence started to attack Rus'. But they could not capture these lands, too good of soldiers were the Vedruss. Even with small numbers they defeated hordes of enemies.

Two thousand years ago there were no princes in Rus' and there were no lackeys, there were no poor and there were no rich. Rusiches lived in their kin's domains, the land was fertile, everyone was well fed, dressed, shoed, no one depended on anyone, all were equal. Life aspirations were to the joy of life, and life really was joyful, filled with creative, interesting deeds, with fun holidays. And there was no time for Rusiches to be bored. Either the weddings were taking place, or babies were born. Interesting amusements were happening at the holidays. Women and men specially prepared for these interesting games. For example, in mastery of an ax, they competed, who would more quickly cut out of the thick log the figure of an animal, for example, a bear cub. There were also such games, which identified best warriors: who better mastered the shooting with a bow, competed in the skill of riding a horse. There was such a trick: Rusich stood full-length on the rump of the horse, the horse was running at this time, in each hand they held a sword, doing a flip back and forth, and again rose to their feet. Or two horses were riding two or two and a half meters from the each other, a Rusich jumped from one horse to another, while spinning, in a spiral. At full gallop, they threw perfectly on the target special knives, axes, short spears. Rusiches used weapons only during military games and military gathering. But the most interesting - is that the Rusiches never attacked anyone, did not do harm to anyone even in their thoughts. At that time, the Vedic culture of life was not yet lost. But to learn the martial art for them was of interest. There is nothing wrong with

this, on the contrary it is physical culture, the culture of the body. Women embroidered and weaved not only from threads, but also baskets from the vine, from the birch bark – the shoulder bags, different kinds of dishes from birch bark and not only, etc. And how they sang songs, and led circle dances! From such a singing one will forget all the woes in the world.

You can say that the Rusiches of that time did not have enough time to rest from the holidays – so saturated and bright was their life.

The qualities that warrior Rusiches possessed

Those people could change the gravitational field of the earth – slightly, but it was enough to make them overcome some obstacles, for example, a high mountain, a swamp, a fortification, fort walls. They could be under water for a long time, holding their breath, and so on.

At that time, Vedruss could fully manage all the energies: move around the swamp using gravity (they had only one thing left to do: to move with a certain speed and not stop – the soft surface of the swamp became hard for them); they could run uphill at the same speed as on flat surface (for this they also used gravity). Only the Vedruss could do this. They could easily overcome the fortress walls of cities without adaptations; they could knock down enemy soldiers to the ground, without touching them physically, make them turn their back, to force them to throw down a weapon. Warrior-Vedruss undressed to the waist during the battle. They had no shields, each had had a sword. They used them skillfully not at the expense of physical strength, although physically they were very developed, even very much so, but by connecting oneself to the universal energies their bodies became the final point of these energies. People passed into another state. They saw the flying arrow coming at them.

For the Vedruss the well prepared enemy warriors armed to the teeth were as dangerous as small children, armed with wooden swords, no more. That is why the ninety Vedruss warriors easily coped with the 5,000-strong army of Romans (chapter "The Battle" from V. Megre's book "Energy of life "). There is nothing fantastical in this - it's reality.

A bare body or just a light linen shirt helped to merge man with the cosmos, they do not have a metal armor. At that time this was not difficult for the Vedruss, for they trained in this knowledge since childhood. Such warriors could run for several hundred meters the same speed as a galloping horse.

Why did the Vedruss fell asleep during breaks in the battle?

Because when a person is in this state he spends a tremendous amount of energy. His physical body undergoes strong overloads.

The longer the fight lasts, the more difficult it is to maintain the strength. During sleep, the physical body is more quickly restored.

This art was taught under the guidance of a volhv and experienced warriors from childhood in the form of games. Later it turned into specific skills, the ability to use energies to help your body.

THE FIGHT OF THE VEDRUSSA

Vedruss warriors stood in a few lines. Amon them were seen women with swords in their hands, some had two swords as well as men. Wearing linen clothing, on the head are woven from herbs head pieces.

The enemy was approaching, many times greater in their number. Now they will converge - love and hate, happiness and a stinking sadness, a bright dream and a thirst for force and profit, the pure breath of flowering meadows and evil breath of the enemy.

A young Vedrussa with blue eyes, like the sky, with long blond hair, of Divine beauty and a tenderness of a flower, she stood next to

her beloved, with her half. Not so long ago they conducted a wedding rite and created their own Love of Space. And how nice it would be to live in your kin's domain in love and joy, to give birth to children. But the enemy came to their native land, and the Vedruss stood up to drive out the evil.

She possessed the Song of the Universe, that is, the art battle of "Devi" (or "Nine"). Young Vedruss beauty began counting, as they taught her in childhood. She liked these studies, they were conducted by the volhvs and by skillful warriors. On "one" – she takes a breath, the thought has gone to untwist its spiral, and so on until nine. On the ninth breath the thought will reach the constellation "Nine" – that star, on which her ancestors live. Earthly body will receive such energy from the cosmos dew to which it will become invulnerable to the enemy. In this state, she may die only from dehydration of the body or from a blow from the back.

Vedrussa felt light in her body, her thought became clear and calm, she knew what to do in the next second.

The enemy army was approaching. Here already heard is their hard breath. In the nose struck a strange, sour smell, the black eyes of the enemy flashed through, in them was fear and anger. The left leg has gone forward and aside, easy movement of the Vedrussa's blade – and the enemy's sword repulsed. Short throw of the blade forward – the attacker did not even scream, still standing on his feet, he was already dead.

Her half, her sun, her beloved led a fight near by. In each hand he held the sword, the movements are light and confident. Already a few enemies spread out on the ground.

The battle grew stronger. The enemy knew who they were up against. The Vedruss – skillful warriors, they can be defeated only by numbers or with cunning and trickery.

The invaders developed their tactics of fighting with Rusiches. Several people at once, tried to go at one person, they tried to come from the back and hit with a sword.

Vedruss flanks began to retreat to create a peculiar wedge and cut the enemy army into two parts. Rusiches calculated everything, they should succeed, otherwise this fight will be their last.

There is no fear of death, for there is no death, but we must not perish, but defend the Motherland and the Kin.

The horn sounded. The Vedrus wedge began to move forward. Here it is necessary to pay attention to the distance. The enemy should not wedge themselves in between the soldiers. Trying sooner to divide the enemy.

And now the point of the wedge is behind the enemy's backs. Up flew the white dove-"turned over" and began to spin its pirouettes. This is a signal for the warriors who are in the ambush. They struck fresh forces from the rear. The outcome of the battle was resolved. Soon everything was over. And now - drink water, or just fall into the water and lie in it and let the body become saturated with moisture.

The young Vedruss beauty barely stood on her feet, her clothes were splashed with blood, a stranger's blood. Two halves - he and she - hugged each other tightly. For them, there is no life without each other. With bare feet they walked along the stars to each other, so that once upon a time, having united in a burst of joyful love, they could create the energy that does not have an end - it is for the eternal life of the Universe of the entire creation. Such energy is called a FAMILY. Two halves were united eternally by the energy of Love. It is truly two halves, and they truly were united by love.

Man and a woman, in energies they merged together, merged for real, and love fastened and harmoniously linked all thoughts, desires and aspirations of people, and the Universe helped them in this. Because the family - is a cosmic unit of measurement, the measurement of the harmony of the Universe, and therefore its proper development, that is, the eternity of life, for man - is the center of the Universe. And if one of them would perish, the other

would still be fighting the enemies, but would not seek life for himself, but death, and he would have thrown himself at the enemy's sword. And the enemy could not understand such a secret. And it was simple – the pure hearts of the Vedruss, in them only love lived, a mighty energy – it is always so cheerful, and attracted them to the clouds. And for a man another woman does not exist on earth. A woman does not see no one but her man. If one left this world, then for the other the sun went out, and a day is not a day, and a heavenly garden is not a garden. Of such is worthy only the bright high souls, as our ancestors possessed.

* * *

*And the sharp sword cuts out
Stubborn and evil verses,
And the sharp sword cuts out
And the stars bowed their heads.
You can not kill Holy Rus',
You can not kill the holy word,
As long as there lives one Vedruss,
A dream will fly to the heavens again.
Insidious and evil lie
Is still tyrannizing soul and body,
But you carry on your hands
Three truths: Love, Hope, Faith.
Enemies are facing you,
Skillfully tightening their rows,
But the Rusich accepts the battle,
And the spirit is strong, and he looks boldly.
Realizing the pain of centuries,
Again, you remember the tears of your beloved,
From the throat, only a groan bursts:
"Save yourself, my love!"
You hold the sword, to win,
There is simply no other in my thoughts,
Let the blood boil in the veins,
A Vedruss will save his planet.*

Constellation "DEVE" (Nine)

You call this constellation "the Dipper". The handle consists of three stars, the dipper itself of four.

The four stars of the constellation "Deve" are populated by Aryans, that is Vedruss. Aryans and Vedruss – it is the same thing, direct connection. All the four stars are larger than the Earth, but not by much. Today there live the Kin, souls of the Vedruss.

Of course the souls can move in any direction, be on all the plains of being of the Universe. There are nine of such plains. The Earth does not apply to such plains, the Earth – is a place for creation, for on the Earth a person can live in a body, that is in the flesh. Only in such a state a person can create a solid, visible world, he can create on other planets, and can even create the planet itself. Initially in the Universe there were eight worlds, eight cosmic plains. The link was the number eight, which represents a closed Eternity. But God created the ninth plain of universal being – a Man. And the ninth plain became the most significant and meaningful in the life of the whole Universe, for Man can create and build eternity, resembling earthly life. For life on Earth will never stop, but only with one condition – for the Sun to always shine. And the Sun – it is the love of the people. That means, on Man depends the life of the Earth and people themselves, on their kind, creative life. In such a way, a Man is the central link of a harmonious, happy life of the cosmos.

Constellation "Deve" appeared when Man was created. The ninth plain harmoniously blended in the life of the Universe.

Number "9" means – God and Man are united and are inseparable. If the number "8" represents a closed eternity, then the number "9" – eternity closed – means, that Man is free in his doings, God gave him full freedom.

All the numbers of the science of math – are the essence of the Universal existence. For example, zero, – means a cone, a circle,

eternal rotation.

Today the number "6" is written as an upside down number "9". In such a way the darkness aspires to destroy the ninth plain, created by God. Number "six" was written as a number "7", but with a line in the middle. If you turn the number "9" upside down, then you get the circle of eternity on the bottom, and the open circle on the top. It turns out, that Man created God. But God - it is a Creator of everything, including Man. Number "6" in such form has a destructive energy, it carries false information.

The art of battle of "DEVE"

The art of "Deve" was to move into the state of the Song of the Universe. This was achieved with the help of the breath and with the help of the speed of thought. The faster the speed of thought, the faster a person took himself into this state.

The breath of the person - it is the energy of the cosmos, it is one of its rhythms. A thought - it is an energy of a person, not just energy, but the most important energy, because it is the creative one. This is what distinguishes Man from everything else on the Earth.

Two of these energies by virtue of education can be connected. When these energies are connected, the thought possesses divine direction, that is becomes in the likeness of divinity in the sense of purity, happy creation for everyone. The person passes into a different emotional dimension. Fast moving, unseen objects for him start to move slowly, he can easily turn away from or deflect the flying towards him arrows, blows of a spear of a sword. And all of this is due to nothing else but the speed of thought.

The thought was directed towards creation, such person illuminated love. For can love be defeated? Love can not be defeated!

Why the Vedruss were strong soldiers

Why do men like to train their bodies, to compete in skill and strength among themselves? Because the whole of nature is arranged like this, and this has its own wisdom, because everything must be developed. At a young age the human body must move a lot, because there is a building and a nourishment of the body happening by all the cosmic energies. These energies must pass the genetic selection, split and replenish the body with some of its physical essence. There are planets responsible for bones, there those responsible - for tissue, vision, hearing, reason, mind. Children like to compete, and they should be promoted in this. This must necessarily be combined with the mental activity. Physical movement and movement of the thought, when the child thinks, together they give a harmonious development of a full-fledged individual. A man creator grows up, in him the Divine energy is stored ready to fearlessly build, create, the completely new, the unknown, but always pure, good, the bright.

One must not ignore the physical body and its correct development, therefore, great importance was attached to physical development of Vedruss. For example, why the Vedruss could control the sword with both the left and right hand? Almost always a person is right-handed, that is, his right hand is working more, than the left hand. It depends on the cosmic bodies which interact with the hemispheres of the brain of a person. If we develop only one part, it means we develop only a part of cosmic energies, which are responsible for half of the correct life activity not only of the physical body, but also the subtle, invisible bodies.

Therefore, from childhood, the left arm was trained (including work with a sword).

A young man at the age of 16-18 perfectly mastered both the left and right hand. Through the ability to hold his breath under water he trained the lungs, internal organs were being formed -

they became more viable.

They studied how to direct a horse, ride it, train it, that it understood the commands. This brought a huge joy to the children, it stimulated them to acquire other knowledge that they did not want to learn. In their training they were drawn one after another, each tried to keep up with the other.

Thus, when it came time to protect the Motherland from the enemy, the Vedruss were the best warriors, there were no equals to them in the art of war.

How the Vedruss knew in advance, that they will be attacked

Even today, some can predict rain a few days ahead with the help of signs. At that time the Vedruss lived in their domains. Each tree, bush, blade of grass felt and loved them. Back then the thought of the Creator worked - everything is for the good of man. But man possessed that true energy of his sincere love for everything. Space has a connection with the cosmos. Through nature one can talk to the Universe, strengthen his desire, to receive information on events, and negative ones that will happen to a person in the future. Volhvs possessed such knowledge.

When a person is born, they say that a new star lights up. This is a bright energy, the energy of life. When there is a negative energy in the cosmos that wants to put out some stars, then these stars start to signal this, asking for help and protection. Their light becomes uneven and uncertain. The volhvs easily read this. With the help of the stars they could predict the future of any continent, and not just one Rus'.

Why did women participate in the battles

A girl, when she gets married and becomes a mother, she changes as an energy. A mother – it is the one that gave birth, and she is fully responsible for the life of her child. A young lady, who created a family, on the subconscious level takes responsibility not only for her children, but also for her husband. The family for her – it is that, for the sake of which she lives, for without her no children will be born, and her husband will not fulfill all that he wants to do, today it is his activity – business, art, creative work. Without his woman, a man can not create. This is true, that is why a woman always serves her husband in a great cosmic sense. It is a harmonious life of the family and people in general. This does not mean that the woman is downtrodden and offended, on the contrary, a woman must always be beautiful, healthy, cheerful, charge her husband with her vigor resilience, support him morally, create for him all the conditions. Remember, women, on you depends who will be and what will your husband achieve. Only one condition: let the man choose his own way with his heart, and you must only help him. If you will interfere with his desire and humiliate him, you thereby violate the universal harmony. Your task is to help your husband reveal himself, help him fulfill his mission, and not to impose your own.

The guarantee of a strong harmonious family is Love. Love with such force connected the two halves among themselves, that is, the husband and wife, that the separation for them, was in the likeness of death. Therefore at that time it was no surprise to anyone that women, together with their husbands, protected their homeland from the enemy. Those women, as a rule, possessed the fighting skills no worse than men. This is the great culture of our ancestors. This – is the foundation true Vedic knowledge. For truth – is harmony and harmony – is a happy life.

RUS' ONE THOUSAND YEARS AGO

In those days this land was still called Rus'. Although there were cities, they were very small. Fairs were taking place there, artisans and foreigners lived there. Indigenous population can still be called Vedruss, but by that time they were called Rusiches. They lived in villages, in their own kin's domains. But degradation, that is, immersion in "sleep", was already in full swing, because there appeared princes. Closer to the end of the first millennium from the birth of Christ (you have such a chronology) Rus' was being invaded by Christian preachers, they came before too, but in smaller numbers. These preachers carried their faith, ideology, that is, culture of life. But in fact it is an anti-culture.

They preached with their sermons a turmoil in the hearts of the people, as well as constant military attacks on Rus' - have done their job.

Rusiches of that time began to unite their Kin with some more prominent Kin. They created a unified authority, otherwise it was impossible, since in order to defend their lands from the enemy, it is necessary to create powerful squads, and the commander should be one, whom all will obey. Subsequently, in such Kin men were called princes (knyaz'), the princely Kin.

It was at the junction of two millennia that they managed to envelope Rus' with the occult teachings called Christianity. What happened there in detail, we we will not say. We will concentrate on prince Svetoslav.

Prince Svetoslav lived in the 900's after the birth of Christ. He was killed, pierced by an arrow, at the age of forty.

It must be said that this was the last prince, who fully valued the culture of his people. He did not want Christianity in Rus'. Enemies strongly hated him. He spent many years in military campaigns, they

was always victorious, destroyed enemy cities, destroyed the enemy. It is about this prince that one can say that he is a true Vedruss. He consciously preserved the knowledge of his people, treasured it and selflessly loved the people, to which he belonged.

This man did not submit to Christianity, but on the contrary, seeing a great evil and trouble for Rus', he exterminated Christian preachers, seeing how cruel were the people in black cassocks and those warriors who came with them to the villages. People who did not want to accept their faith, they killed, and houses were burned. Young women were raped, but subsequently such women killed themselves, as to not give birth to a freak, that is torn out from a Kin (a child not from his own Kin). For the Rusiches it is unacceptable, and therefore they preferred death.

In the future, female Vedruss exerted such strong resistance that they became feared no less than men. Many of these women possessed knowledge of combat weapons no worse than men. When men went off in their squads on a long journey, then it was women who became the protectors of their settlements. They sought out and destroyed small detachments, that is gang invaders. These were the remnants of defeated troops of the enemy.

Rus' was bleeding. The population was destroyed by fire and sword. It is the female part of the population of Rus' that did not allow full capture and enslavement of its people. Women-warriors moved by horse, they knew how to ride perfectly.

But our story is about Prince Svetoslav. It was an unbeatable warrior himself personally. He possessed the state, called "Devi", that is, he sang the Song of the Universe.

The present city of Kiev was then a settlement. There settled foreign people, artisans, stray singers and musicians and just people without a kin, without a tribe. Here fairs of Rusiches took place, people gathered from all over the vast districts and from their villages. Trade fairs of such continued for several days. At such fairs at that time the young people got acquainted, and often afterwards

weddings happened, that is, the wedding song of the Universe for two, which were united by the energy of Love. Families were strong and reliable, because the Rusiches of that time never created families with foreigners, they fully cherished their Kin, cherished the purity of blood, their culture and lifestyle, for very one understood their purpose, that is for what it is given, the embodiment on Earth. Those people could be defeated only by distorting the truth, spreading lies in small doses from generation to generation.

Now the descendants of those Rusiches have become cosmopolitans. It's all right, you will return the culture of your ancestors. Such among the Dnieper steppes and oak forests lived those people, and their lives were truly dangerous and difficult.

A few words about Prince Svetoslav

Prince Svetoslav gained fame as an outstanding individual with wisdom and courage, and of course he was always helped by the volhvs. Thanks in part of the volhvs, he was always ahead of the enemies, destroying their plans and he always won. Rusiches at that time still possessed knowledge, how to use the energies of the cosmos for their own purposes. They were strong and skilled in the military arts. One Rusich warrior had the same power and ability as twelve common enemy soldiers. And if you not take into account the savvy and incredible willpower.

These people possessed such boldness as did not possess anyone else. Prince Svetoslav loved to say before the battle: "I'm coming on you. (in Russian "Idu na Vyi) " It means – I'm reacting to a call. "You" is a negative energy in this case. "I live in harmony and do not create evil. You are some kind of aggressive force, who wants to attack me, conquer or kill. You create disharmony, breaking the universal order, you – are that energy that destroys the existing

harmonious, holistic world. "

"Idu na Vyi" - that is, I'm going at the evil, because I am put in such conditions.

And Svetoslav was taught this in a situation which happened to him in his youth.

«I'm acting on a call»

There was a girl-vedrussa of extraordinary beauty walking, like all the Vedruss girls at that time. Coming towards her was Prince Svetoslav with his small squad, and not even with a squad, but a small number of his closest friends. And this beauty attracted his eye.

Svetoslav climbed down from the horse and began to speak kindly to her. But the Vedruss of that time observed their culture and cherished it, and the girl asked Svetoslav to let her go. But he kept laughing, enveloped by his youth and joked. The girl moved to the side, about ten meters, and began to squat and roll on the ground, so quickly she did it, saying something, that everyone of the soldiers and Svetoslav himself was dizzy, and it grew dark in their eyes.

- I'm acting on a call! - the girl cried out, coming close to Svetoslav. After these words, Svetoslav fell on his knees and felt fear in his heart. And the soldiers snatched the swords, feeling danger, fear filled their souls, and some began to fight with each other. After a while, everything went away, the girl was gone.

Such power possessed the Veds even at that time. And the whole secret, the most important thing is that she lived in her own kin's domain. And it gave such power to man, collecting energy from the whole cosmos.

After that, Prince Svetoslav began to use this expression - "Idu na Vyi". And he changed after that, for he loved to party, and became a Vedruss man to full extent.

Such knowledge was given to the Vedruss by special volhvs, who taught the children right in their villages. The girl used this knowledge, to merged with the native nature, through her a powerful flow of energy came in, in this case, the energy of fear, from which the warriors felt terror. The native nature and life in her domain it all helped her.

MILITARY CAMPAGIN OF PRINCE SVETOSLAV

In the time of Prince Svetoslav many abilities of the soldiers were lost in connection with the degradation. And so already the Vedruss kept on their territory an extra five hundred years, keeping their purity from the worst of attacks of dark forces. Practically the whole population of Europe of that time participated in armed attacks on Rus'. There was a threat from all sides. Here we will describe one military campaign of Prince Svetoslav.

* * *

Svetoslav received a letter from Constantinople on the fact that the army will come to Rus', the villages will be burned, people will be taken to slavery, and the prince will be caught alive, and then will be put to a fierce death. Prison for the Vedruss warrior was the most terrible shame.

Prince Svetoslav on the advice of the volhvs wrote the answer, where he said such: "Why should you come, waste time on such a distant trip. I'll come to you myself, will cease Constantinople and destroy everything around it. " And in detail outlined what exactly he would do there, for what purpose he will come. Only did not specify the date, so that they would not be prepared for him. The thought, launched by Svetoslav and the volhvs on the one hand, will be supported and strengthened by the other side of the

defenders of Constantinople, because they will think about this letter. A lot of people with their thought will help Svetoslav.

* * *

The army of Svetoslav numbering about eighteen thousand came to the city of Constantinople. Caesar gathered a hundred-thousand-strong army and concentrated it in the city behind the walls. Negotiations began. Caesar decided to deceive Svetoslav and told him: "We do not want to war with you, and it is better we pay you tribute. Say to us, how many warriors you have, and we will pay each one equally." They thus decided to find out the number of soldiers Svetoslav had. And Svetoslav, deciding to take more tributes from the Caesar, calling the figure - more than forty thousand.

Meanwhile, the army, hidden behind the walls of Constantinople, is coming together into battle formations. The army of Rusiches does not suspect anything, they are in expectation that they will be paid a tribute. But here the gates opens, and from them the enemy's army comes out, ready to engage in battle.

The horns of Rusiches sounded, calling to be ready for battle. The movement began, the soldiers began to form into squads, that is, according to their own Kin. Each Vedruss settlement provided soldiers, out of them regiments were formed, but the soldiers of one village were never separated because they had a good joint skill combat. Rusiches began to stretch their army, creating an oval, concaving inward.

The enemy army moved in its straight rows. Cavalry, numbering about thirty thousand horsemen, began its formation on the sidelines. It should hit the flank and try as hard as possible to destroy the Rusiches. Their cavalry will be divided into two parts of fifteen thousand. The first part of the cavalry will fight for about an hour and a half, then it will be replaced by a second

part - such they will change each other, giving the tired ones the opportunity to rest. The Rusiches will not have such possibility - this is exactly what the enemy was counting on.

The Vedruss were all on horseback, skillful horsemen.

The horses were trained and obedient to their owners. Bridles with which the Vedruss horses was bridled, ended with two ends. The ends fell at the feet of the horsemen. Rusiches, sitting in the saddle, were holding in each hand a sword, and with his feet dexterously and skillfully controlled the horse. And the horse trained so that it itself fought the enemy with hooves and biting with its teeth. Understanding between the rider and the horse was perfect. Animals at that time were still friends, loved and protected the person to whom they are accustomed to from childhood. Such an animal will never betray and will not abandon its loved one in trouble.

The Vedruss army began to divide into several parts. It was decided to meet the enemy's cavalry with their own cavalry.

For this they could allocate only five thousand horsemen, the rest dismounted, horses began to be taken to a secluded place. The enemy was not napping, it hastened to engage more quickly with the opposer, who was taken by surprise. The Vedruss began to back away, did not enter into battle, to better prepare.

Meanwhile, the cavalry of the Vedruss are already lined up and was ready to start the battle. Horn sounded, Rusiches began their attack. Five thousand strong cavalry of Vedruss against the enemy's thirty thousand strong cavalry.

Bows and arrows came into use, riders rode, spinning the "fan", not reaching the enemy by the flight of the arrow. At full gallop, skillful archers sent their arrows perfectly on the target and were flocking on the flank of the enemy. From such quick and audacious actions of Rusiches the enemy fell into confusion. From the skillful shootings they killed many and wounded others, they had to reform the ranks.

After the "fan" attack and defeating a large number of enemies by arrows, Rusiches grouped on the left flank of the enemy. Again they went on the attack, now they crashed into the ranks of the enemies. The battle began. But not all five thousand participated in the battle. Approximately one and a half thousand of horsemen, holding their bow in ready position, rushed along the uneven structure of enemies and hit them with arrows. The thing is, that the enemy riders did not have bows with arrows, they did not expect, that this could happen. They were counting on surprise and a large numerical superiority. Meanwhile, the enemy army was melting, majority of commanders of the detachments was killed. Confusion began. They began to argue, who should take command and what actions better to take in this situation.

And at that time, fifteen hundred horsemen, having fired all their arrows and striking much of the enemy, found themselves in the rear of the opponent. And the most incredible thing is that - they did not ride back to connect with their own, but hit from behind with such fury and pressure that in the enemy army a panic began. Each Rusich could use two swords. Horses ideally listened to the riders. And what was most striking and surprised to the enemy soldiers, is that there were no armor on the Rusiches, their bodies were exposed to the waist. But no matter how hard the enemy - tried to strike the unprotected body it was impossible. By some miracle the Rusiches always managed to repel or dodge the enemy weapons. But they themselves cut down enemies with an extraordinary accuracy and confidence. If a Vedruss horse was killed - he did not sit on the enemy's, and quickly left behind the backs of his comrades. There nearby spare horses were held trained in military affairs in a Vedruss manner. And again they came into battle.

The horn sounded. One and a half thousand warriors, like one, retreated and rushed to their cavalry. After several hours of fighting the horses are tired, they need to be replaced.

And the warriors themselves will now be divided into two parts. One half will continue the fight, and the second, after driving to a safe place, will sleep. It would seem, that after the battle people are excited to the limit, one can not fall asleep in such a state. But the Vedruss have a highly developed thought, they can easily imagine for themselves an image, in this case of complete tranquility, and also including special breathing, they will go into the depths of a sweet sweet sleep and will sleep until they are awakened by the sound of a battle horn. Rested, with new strength, on fresh horses, they will engage in battle, replacing their comrades. This maneuver is known and practiced by the Vedruss at gatherings and games. In such a way they can fight a very long time. And now they know ahead of time, the outcome of the battle. In a few hours the enemy will be encompassed by panic, physical fatigue and lack of self-confidence will make their effect. In the meantime, the Rusiches foot-soldiers have several hours of fighting with superior forces of the foe. Here, too, bows with arrows are used. The Vedruss are maneuvering. The oval, created by the soldiers, is divided into two parts, and the Rusiches struck from both sides to divide an enemy army in two. They succeeded. The thing is, that the enemy's army was collected from different nations, each unit has its own commander; also the language barrier played a factor which was to the benefit of the Vedruss. Svetoslav with his associates, having oriented himself about the size of the enemy, worked out the most acceptable plan in this situation. And this plan was victorious. If the Vedruss are successful in performing it - they will truly win, they will have complete victory. The army of the enemy was represented by a big black bird. The Rusiches reason as follows: if the bird's wings are cut off - it can not fly, if its legs are cut off - it will not be able to walk if its beak is cut off - it can not peck, but if its head is cut off - it will die. To get to the beak, you need to cut off the wing, that's what they attempted to do by separating part of the troops.

This part of the troops, that is, the image of the wing, they started confidently and methodically to destroy. Several thousand held back the enemy which lost the commander, so that they could not reconnect. In the enemy ranks a misunderstanding began, incorrect interpretation of orders, lost was the interaction of neighboring regiments, because the army consisted of different peoples, and they talked different languages.

Then the bigger part of the Vedruss began to leave the field fight and consolidate on the side, building their own squads in the form of ovals. They created three ovals and from three directions hit the main army of the enemy. The opponent furiously fought back, and yet mutual assistance they did not have. They led the battle, not controlling the situation, they fought as best each one could, nevertheless they hoped for their number superiority.

Rusiches, on the contrary, specifically fulfilled each their own task. They knew from the beginning and to the end the whole plan of the battle. Before them there is a clear task, and they will perform it with perfect accuracy.

The Vedruss hit in the center of the army, that is, in the head of the "bird". To get to the head, they need to cut off the beak, but this is an elite army, collected from the best warriors which have great military experience, knowledgeable in strategy and tactics of combat, participated in the campaigns and battles. But since the Rusiches struck from three sides, it is easier for them to decapitate the "bird". Nevertheless, the resistance was strengthening. The enemy showed high professionalism.

The elite army proved to be strong and combat-ready.

But the Rusiches knew that this was the head of the "bird", the goal was clear and understandable. With a severed head, the "bird" will perish.

The evening was approaching, the sun was setting. But the Rusiches can continue to fight in the dark, and today they use it to the fullest.

The enemy began to retreat to the city gates. But several thousands of Vedruss stopped the retreat. They will not allow the enemy to pass through the high walls into the city, since they would have to storm the city, and these warriors will replenish their defenders. It is already noticeably dark, and the remnants of a huge army began to leave hastily into the steppe, they realized that they have been defeated. A hasty retreat began, that is, running away. Rusiches pursued them while it was possible and feasible. The cavalry of the Vedruss also fulfilled its task. Most of the enemy was destroyed the rest ran off erratically.

The battle was over in the dead of night with a complete victory of Rusiches. They gathered the main force in one place and settled down to sleep. Several squads they left for protection. While it was not possible to calculate the losses. In the morning, with the sunrise, all this will be done, meanwhile they were helping the wounded, putting pain relieving and blood stopping herbs on the wounds, they used resin of coniferous trees with other additives for gluing of chopped wounds. Such an adhesive possessed a disinfectant and an analgesic effect and saved many warriors' life.

* * *

Such were your ancestors. Is it possible to defeat such a people in open battle? Of course, not.

Your ancestors knew the essence and meaning of their existence, what is kin language, kin land, kin village, kin relatives, mother, father. These people did not need to be convinced, urged to do something, for example, to defend the Motherland, or to march to the territory of the enemy and defeat it there. Namely the victory, no one even allowed a thought of defeat, for the thought is creative, thought always drew a victory.

Historians talk about Prince Svetoslav, who spoke front of the

soldiers, as a commissar before the Red Army. For example, for some reason they say, that one day before a difficult battle he addressed the soldiers with the words: "Never Rusiches fled from the enemy, and it's better to die, than disgrace, for the dead do not feel shame. " It a terrible lie. Prince Svetoslav did not need to awake the soldiers and call on their courage. At that time the Vedruss understood very well the importance of thought, especially expressed aloud. Every Vedruss-warrior understood very well what he is capable of and what the enemy is capable of. During the battle, a Rusich mentally drew his spiral of life, and it was not interrupted, this spiral was connected with the Song of the Universe, that is, with Eternity. In this state there was another kind of sensitivity, man entered into another dimension of being, for it is multifaceted. If the Vedruss took the battle sword in their hands - it means they are threatened by danger, then they are being attacked by the invaders. These people were so ready for self-sacrifice that it was not necessary to persuade them, they do not need rallies and slogans.

A Vedruss warrior never thought of his salvation, he dreamed only of one thing: to drive out the enemy, to cleanse the land. And if he has to die, he will not do it without thinking. Such a state of mind and their character was formed by the education and culture of life of the Vedruss, by the knowledge they received. A Rusich will never be able to surrender as a prisoner. If the battle was lost, they themselves threw themselves onto the enemy swords or stabbed themselves with a sword in their stomach, if it was not possible to do it in another way. Under the belly button there is the point called "hara-tract". *Ha* - rotation of eternity, *Ra* - the sun, *tract* - the life path of man. *Hara-tract* - a life path, that guarantees the rotation of the sun and the eternity of life, that is, the character or the stem, due to which the Vedruss will never give up his Kin, his people, and his culture.

Such a death for them is not something terrible, but a normal

performance of his cosmic purpose, in this case of a warrior. After all, to perform your duty before your Kin and your people – is to fulfill your duty to God.

The main reason for such military skill of Vedruss

Why were these soldiers, our ancestors, invincible? Try to think about this: after all, – only eighteen thousand Rusiches crushed an enemy army numbering a hundred thousand troops. Is it possible? It turns out – it is possible. What is the mysterious reason for such abilities and military skill of the Vedruss? But it turns out – it's all about the lullaby song, the whole thing is about the lullaby song!

From the earliest childhood, seeking to meet with his girl-half, a boy with a great desire studied everything he was taught, because his mother said: "You must be clever and strong to meet your girl." And this boy is working on himself, training his body, studying the military art not just somehow, as long as they leave him alone, but he himself wanted to learn everything in the most serious way, for real. He had a huge incentive, which was formed on the subconscious due to a lullaby song. And while the boy was growing up, the adults tolled him he was to become worthy of meeting with his half. This is the main the secret of the fact that the Vedruss became strong, capable, talented, they had strong families, in which true Love lived, and she did not leave them and in the war they were invincible. But there should not be wars, only degraded people do this, devoid of reason. A family remains. The family is the most important thing in a person's life. It is the desire to create happy families in which will live the energy of Love, was the most important stimulus for the Vedruss in working on themselves, developing themselves and shaping as a strong harmonious individual.

VEDIC CULTURE OF LIFE

Vedic knowledge – it is the genetic memory of Vedrus. It can not be learned, it can only be awakened in oneself. The culture of life and knowledge – are one. Vedic culture – it is a person's understanding of the whole meaning of earthly incarnation, that only in this state man has all his hypostases and can create in the likeness God.

Earth – a planet created for man in a happy joy, and there was no energy of sadness, it was artificially created by the "dark" people. When today's person will see the joy in planting of trees, flowers, grasses, in singing of birds, in a trickle of a fresh breeze – it will mean, that somewhere there, on the subconscious, he is remembering his true self.

When you manage to understand what evil, ignorance and death carries the so-called technocratic progress – this is the beginning of your Vedic life, for this knowledge has been laid in you from the day of Creation.

Wake up, Vedrus, everything is in you!

The orchard you have grown, your Space, where Love lives – that's what will tell you about the Vedic culture. And we will only help you and correct your steps and actions.

Slavs

Initially, people knew why they lived, and why the Earth is, what does the earthly embodiment mean. People lived in great joy, harmony. Embodied on the Earth sent by Kin, and they treasured it very much, protected their Kin, because they knew: everything that a person can create in the image and likeness of God – is only

when he is incarnated in the body on Earth. The Kin guarantees incarnation on the Earth. Culture of life, foundations, customs festivals, specifics of character, style of life imposed on itself the same imprint on related peoples.

When the degradation began and wars began, the kin peoples began to unite in order to stand up to the enemy.

Slavs - are the Vedruss. This word, this concept of it appeared after the separation between Aryan peoples happened. For example, today's Germany Baltic countries - went their own way, today's Russia, Ukraine, Belarus and other countries - to the end kept the knowledge of their people. This people was called - the Veds. With them remained one more Aryan people - Russi. It was these two peoples that held out and successfully defended themselves for so long from the encroachments of darkness and gradually «fell asleep». At the physical level, they have degraded, and on a subtle plane they "fell asleep" and remained unbeaten. Today it is time to "wake up".

Slavyanin (a Slav) - is interpreted as the retention of two energies "Yan" and "yin" in harmony, but it will not be a full interpretation, therefore it is wrong.

SLAVA (glory in English). *S* - power, *Lava* - some energy. *Slava* - energy, which contains a huge power.

This power was possessed by people from the Aryan Wheel of Eternity. These people possessed the knowledge, which allowed them to within themselves, that is, to balance with yourself a harmonious life of the Earth, the Universe and themselves.

Energies, which they harmonized within themselves, are called *salon'*. And those, that they harmonized in the space (in the external world), are called *posolon'*.

Solon' - is a swastika, rotating against the movement of the Sun. *Posolon'* - is the swastika, rotating along the movement of the Sun.

In the future, the Vedruss increasingly plunged into "sleep," and a

substitution of the true meaning of the word Slavs accrued. And they began to interpret it as they interpret it today – those who glorify Prav' (the world of the gods). But they did not glorify Prav', they harmonized the energies, and this is not the same thing. The gods of the Slavs – those are the images they created, which are responsible for a specific energy, for example, wind or of rain. If they addressed the energy of rain, it would rain if it was needed. Slavs never attacked Slavs, but on the contrary, helped each other. You do not need to praise Slavdom today, but also do not need to forget about it. Come back directly to Vedism – it will be right, a true aspiration to your culture, to your origins. And in the days of Slavs, much was forgotten, distorted. After all, these are the times of princes, nobles, serfs, etc. The people are all equal before God and among themselves. Namely at these times in the Vedic holidays occultism began to be implemented, fire-worship (use of fire, and they even wanted to implement sacrifices, but it did not work out, since the Slavs are too kind, and back then they were still vegetarians). Today your ancestors the Slavs are presented to you as wild people who ran around the fire, jumped over a bonfire, glorified the gods, worshiped fire. Today these people are "asleep", and anything can be said and presented as the truth. But this people are "waking up". We will tell you the truth. If a person worships fire – this person completely lacks true knowledge. This person carries anti-knowledge, anti-culture, which is not inherent to Vedism.

Teachings by the name "Vedas"

ARYI or *Aryans* – bright eternity of movement, of harmonious development, that is, people in the image and likeness of God. Arias – it is a people, and in it there are Kin.

For example, the Veds – it is a Kin, the Russi – are also a Kin.

Namely this civilization "fell asleep", and now awakens.

In the world of energies everything is very clear. Outwardly it seems chaotic.

Not by accident that there are halves. Previously, the Vedruss married their halves, and children were born to them of their Kin – those are the souls of their ancestors. Similarly later they were born. It was a closed circle.

VEDS – this is the people or the Kin (it can be interpreted in both ways), who possessed the truths from the pristine origins, and from this peoples all the truths spread all over the Earth.

Knowledge of this Kin we preserve – the Spirits of Dolmen (and not only).

Veds – this is the people (it is not knowledge) – they stored this knowledge they possess them.

SLAVS – are the Vedruss, who have degraded on a certain stage of their lives, when they lost their knowledge of pristine origins.

Now you know who are the Aryans, Veds and Slavs, and you can define the phrases from such words yourselves.

Today, the truth can not be realized and accepted by people on their own. Those books with the name of "Vedas" which exist today, are written by ignorant people for the ignorant.

What can an occult fire worshiper know about the cosmic world order? For every man – is the whole cosmos. The Universe serves him, and he serves the Universe – the connection is inseparable, in that is the providence of God (*that which is produced by the thought of God*), and this is the eternal life for Man, created in the image and likeness of the creator.

Vedic truths can not be explained on paper it is impossible, because it is a living being, also invisible, a set of energies, their attraction and harmonious coexistence. In fact, a living space (a kin's domain) is the Vedic knowledge. They need to live, they need to breathe!

Tablets of clay, of metal with inscriptions exist; But these are mostly statements, advices and wishes of ancient thinkers. Such plaques can not to give today's person essentially anything. We will explain with an example of your current science of mathematics. A person who has not even heard of math takes that tablet, on which some mathematical equations are written. What can he understand in these numbers and letters? Absolutely nothing.

VOLVH - POWERFUL LIFE OF ETERNITY

A *Volhv*. *Vol* - mighty, *H* - rotation, movement, *V* - eternity, or *HB* - the movement of eternity, or perpetual motion (that is, life). *VOLHV* - is a mighty life of eternity. He possesses knowledge of pristine origins to the fullest.

A *Volhv* is not one who walks and teaches or dictates how to act in this or that way. He will never go ahead of some collective or human society. But he does so, and does it unnoticed, that the people who communicate with him understand the very essence of their right harmonious life. He does not drag them or force them, but only corrects their deeds and desires.

There is only one true path for Man - towards his own happiness. A happy man can only be when he is free to choose his personal life. A person lives with his soul, and it tells him what to do, not his mind, which is directly preswaded by low or just mentally ill people in the form of some kind of doctrines and dogmas, from people calling themselves magicians, teachers, priests, and so on.

A real *volhv* will never call himself a *volhv*, and through his great deeds the people themselves give him such a title. For to the real *volhv* it does not matter what he is called. This is how the pure differs from the dirty!

And the one, who awards himself with some title, he is shod with pride and selfhood, or suffers from a sick imagination and does not

know what he is doing.

Remember that God does not have teachers, and you - are God's children. In you there is everything!

PRESERVING OF COSMIC HARMONY THROUGH HOLIDAYS OF VEDIC RUS'

To our people is inherent a reasonable harmonious life, proper understanding and celebration of holidays, because a holiday for the Vedrus has a Universal meaning. Such holidays harmonize the life of the Sun and other planets related to the Earth, and not only the Kin ones, but also all the others, since the life-giving, warm energy comes from all the planets. Such a holiday, and therefore this energy can only be created by those who possess Vedic knowledge. Such knowledge was preserved in families, in the culture of life, they were preserved by the volhvs. The Earth herself will feel lonely, orphan like if people do not like her, if they do not conduct such holidays.

All the holidays of Vedic Rus' are the relationship of Man as a representative of the Ninth plain of being (the main one) to all the other planets, which links them in harmony among themselves. Each holiday - it is a separate affirmative energetic link. Namely with these links that all the plains of being of people and the life of the whole Universe are linked together among themselves.

Day of Universal Unity

On January 19, water changes its molecular composition, to say it in another way - the energy of life in it increases by many times. Having analyzed it in laboratory conditions you will not find anything. Changes occur on the level of atoms, they change

their life potential.

Water, of course, is life at any time, but on the 19th of January - it is life, increased many, many times!

On January 19, the universal reform of energies takes place and the Earth receives a colossal amount of energy. All the kin planets related to the Earth as if collected in one place with their energies. Water on this day gains such strength (*energy*), that if it remains such then nature will change greatly (the trees will be giant, grass will be the height of the trees, etc. - there will be chaos). It is not foreseen by the Creator that water should be such always, and the nature should be such, as it is created.

On this day, you can celebrate the Universal Unity. Doors of all the planets that are related to the Earth are opened. Through the water there is a connection with the whole cosmos. All the universal energies are present in the water. Wash in such water, swim in it!

This energy possesses such property, that metal pipes and tanks are not an obstacle for it. Tap water has the same properties as in the pond. And no religious rituals have any relevance to this.

Water retains this property from the night of the 19 and up to the sunset. Then this energy flows out of the water into the earth. And the water collected during this period of time from any source in the vessel - does not lose the energy. Therefore it can be stored for years and not spoil.

The Holiday of the Sun

The holiday of spring equinox has a cosmic importance for the planet Earth. And so that the cosmos fully responded to the energy coming from the Earth, before the spring equinox, the Vedruss celebrated the holiday of the Sun or "Hello, Sun!"

Today this holiday is called Maslenitsa.

The date of the beginning of the celebration was determined by the stars, and not according to the calendar. People themselves began to feel the energies, the body was filled with joy.

The meaning of the holiday: people welcomed the Sun after the winter, they gave it their love. That's why pancakes were baked - a symbol of the Sun. Back then they understood that the Sun - is the energy of people. And everyone was happy, and the joy was sincere.

Through this holiday there was a reminder to the whole Universe that the people remember and love it. It was a conscious holiday and therefore universal.

This holiday was held specially to ensure, that the Sun is filled with its goodness, its love, a new gentle force, because in winter everything stops and rests.

If people consciously will thank the Sun for its heat and light, for the fact that it gives life to the Earth - by this they will saturate it with their energy of Love and tenderness. The sun and the cosmos will receive a new energy for the next phase of life on Earth - spring. The spring equinox will turn out to be a real transition into this phase. If such energy is insufficient, then the transition will not happen in full.

The time of celebration of the holiday of the Sun is determined by the energies. It needs to be celebrated in March, this holiday can continue for about ten days.

The Vedruss began to celebrate this holiday approximately from March 5, for about ten days they celebrated, then five days of rest and on the 21st celebrated the Spring Equinox.

For the cosmos, this holiday in February does not provide, does not nourish the Sun with energy. People are not in those energies yet. The trees are still asleep, under the rays of the Sun they feel differently. And the bird-singing plays a role, and in March they sing in a different way.

Earth changes its thought, and heavenly bodies are waiting

of human heat. Today we will advise you to do this in March. And when the Sun and other cosmic planets receive human warmth, they begin to fulfill their mission to the full and they do it consciously, they know what they are doing. And until man does not give such energy, they remain in a sleepy state, at a loss, they do not understand what they should do further. For in the chain of harmonious existence Man - is the main link!

Today during this holiday people were turned into vampires. They eat the Sun with their own thoughts, that is on this holiday they are invited to "eat" the sun. If everyone will eat the Sun, then what will remain of it? But the Vedruss filled the Sun with their energy with their love. The man was a donor. And this is the most importantly, the key in this holiday.

During the holiday people baked pancakes and with this they said to the Sun: "Look, Yarilushko, (an ancient Vedic name for the sun) how much of you we have made!" People said: "We will eat the pancakes (our suns) and fill you with our love! "

People protected the sun.

SUN - means a bright face in all the senses, that is both the physical light and true kindness.

Yarilo - in this case a bright, burning, rough indications for the sun. It can also be used, but Yarilushko - will be better.

During these ten days, no one was surprised that someone came to visit. People waited for guests, waited and were pleased with them. Because the guest meant that it was the Universe came to visit. In the house there were always pies, pancakes, sweets. People wanted to be visited.

Now people are not happy to see guests, because you need to spent money on them. And so, in these ten days, be hospitable, generous, kind, for it will return to you all hundredfold, for this holiday is UNIVERSAL!

Celebration of spring equinox

The holiday of the Sun (Maslenitsa) gradually moved into the holiday of spring equinox. It is better to celebrate it on 21 March. At noon the whole village went to the usual place for the festivities, stood in a circle (a symbol of Eternity harmony), took up arms and expressed to the universe their love, announced to it that with it all the people also go into the next phase of their lives - into the summer one.

Songs were sung about spring, about summer, about the sun, about the earth and of course about love. At home people baked large loaves and pies - a symbol of prosperity and quiet confident life. Went to visit each other.

It is necessary to celebrate this holiday. Leading round dances - together with you the whole Universe is spinning.

No need to burn anything. Everyone carried a little wheat with themselves, scattered it on the roads, on the paths so that the birds would peck and carry the joyful news throughout the whole area about the approach of summer, that soon the Earth will bloom with flowers, and animals, and birds will create families and give birth to their children. Earth wakes up, life continues;

Horovod (round dance) *H* - the rotation of Eternity, *Or* - organized strong, united, *O* - flow of energy in a circle, *Vod* - to lead or leading. *Horovod* - combined (strong) rotation of Eternity in the circle of life.

Holiday of Trinity

The Trinity is held at the intersection of May and June. It may be in the days approximately from May 29 to June 5-6.

This is a Vedic festival, symbolizing unity and the correct interaction of three energies: the earth, the air and water. These three

energies guarantee the fertility and generally a harmonious life of nature.

And what about the sun, because without its heat and light, everything will perish?

The sun – it is the energy of people, their love. The Sun has its own holidays.

Today on this holiday people go to the cemetery – it's not right.

What does harmonious life have to do with a cemetery? There were never cemeteries, no one thought about death, for death does not exist – the flesh of man changes through times in the name of the essence of existence.

The holiday was celebrated in the meadows – among the flowers and different herbs. Wreaths were woven from three kinds of flowers and rejoicing herbs. Wreaths were woven out of three types of flowers and herbs it does not matter what type, it makes no difference. Before tearing off flowers, they were told why, they asked them for forgiveness and permission. And flowers always agreed, for man is harmony and that energy for whom they grow and fulfill their mission on earth. In that place in a month more will grow, even more beautiful, brighter.

People led circle dances, singing songs about the earth, about water, about the wind.

Celebration of summer solstice

The holiday began in the evening, for example, on June 20. Songs were sung, circle dances were performed. Musicians and singers showed their skills, poets read poems – everyone, who wanted to. Back then people knew a lot of songs, they were long, kind, with a happy ending. People sat down in wide circles and began to sing. It is better to sing such songs from two o'clock in the morning. The time comes for those energies, which are awake

at night - they understand the meaning of the holiday and the mood of people, and helped as best they can. Such hymns put a person into a special state, a person felt bliss, he did not feel the body and fatigue, man merged with the universal existence. The meaning of the song formed a joyful, peaceful life of a given settlement and surrounding space. Such songs children will be able to write who will be taught in school "Happiness". These songs are written not with the head, but with the heart, not by feelings, but by the delight of these feelings. Today such a state, such energies can not be attained by people, children in the school "Happiness" can achieve such an emotional outburst, extraordinary delight of the joy of life. The rebirth of Divine energies will begin on Earth. And thanks to such energies the revival of Vedic knowledge will begin among the descendants of Vedruss.

And then the dawn appeared. Praises were song to the Sun, only people did not ask for anything, but thanked and gave their love sincerely, for real. No one talked loudly and did not sing, but together with the birds they created a common choir. They met the sun, joined with it in Love - this is a harmonious life.

SOLNTSE (the sun). So - joint, united, L - love, N - ours, Tse - a kisser. Solntse - joint, kissing love.

* * *

*Holidays of Vedic Rus',
How much wisdom in themselves they carried,
The universal joy of all plains of being!
And people have open hearts.
What can prevent you from creating,
If everything is set up to love you,
If everything is presented to you in full,
And purity comes from you.
Only purity passes through the ages,
Harmony bears all plains of being -
And in this is the plan of the Great Creator!*

PART 3

ENERGY OF TRUTH

Truth – it is a synthesis of vital energies, everything rests on it. The energy of lies (krivda) is always the energy of destruction, of death. To speak the truth – is to increase the energy of life, to ratify eternity.

Why the system, created by the dark priests, is doomed to destroy itself and all of humanity? Because it is based on deception, and people now live in an illusory, deceitful world.

The truth of life – is the earth, the sun, trees, grass, flowers, fresh air, clean water. Krivda is the extraction of fossils fuels, the destruction of land, clean air, water, that is, a technocratic world.

The one who lives in this world – supports lies, and therefore, he himself is this lie. These are – illusory people, unreal, they can be called bio-robots. They are not to blame for this, they are participants in the program of the launched image.

The one who "woke up", let him bear the energy of truth, that is, speak the truth boldly, openly, without fear of misunderstanding and even aggression. Only the energy of truth guarantees happiness to you and your children. The world is mired in lies, hence the rotten water, the contaminated air, deceived people, living their lives in grief and misfortune.

To say it briefly, God – it is love and it really is true. And love – it is always happiness, and this, too, is true. Be truthful, thereby bringing happiness back to Earth.

A person, deceiving someone, actually deceives himself. Because the Universe is so arranged that the energy of lies (krivda) does not find application there, it does not fit into the harmonious life of the cosmos, it manifests itself vividly there as the energy of destruction. The planets reject such energy, and it returns to the person who produced it. So it turns out, a man who seeks to deceive

others, in fact, deceives himself. A person who deceives himself becomes a destructive energy, because he does not fulfill his purpose. Everything has a very solid tendency, if something does not fulfill its purpose - it dies. For example, the human skeleton is necessary for life on Earth, but in space, where there is weightlessness, the bones are quickly destroyed, become fragile, calcium is excreted from the bones, because in zero gravity the body can soar. The skeleton does not fulfill its purpose, and it immediately begins to collapse. Everything that the body does not need, the body rejects.

The universe is also an organism, and everything that it does not need, it rejects, that is, destruction and death takes place.

PRIDE AND ARROGANCE

Why arrogance - is a mortal sin Artazak speaks (Knowledge about Man)

ARROGANCE - it is when a person thinks that he is better than others, but does not know, why is he better, because it is impossible to be better than others. This can be called - the disease of the nerves (that is, the psyche).

PRIDE - it is very good. This is when a person does something real, kind, necessary, and he can always talk about this, because his conscience is clear.

Arrogance - it is an energy, it is very powerful, it has a nourished and a very large egregor. If a person allows this energy to develop in him, then it begins to lead him.

The energy of arrogance was skillfully used by the dark forces. They knew that a person is gradually degrading and will not even understand, what arrogance is, and everything was aimed at increasing of this destructive energy.

For example, sport – it is victory at any cost. At first glance there is nothing wrong there, but this is an outlook of a lost person. What joy happens after, or example, some team won, and what a huge sorrow if it lost. And what, in fact, happened? After all, nothing supernatural happened. And this IS arrogance. Why not be happy for the opponent, that they were stronger today?

Everyone wants to be better than another for some reason. On the material level it all appears: such an image works today, so that a person aspired to be materially secure, as if this is the whole meaning of life. But where is your kindness, sympathy? Why not help the neighbors, people who are in need? Why not make the world more beautiful, kinder, purer for all the people? Namely the energy of arrogance does not allow it. "My car is more expensive than my neighbor's, and that's why I'm great, and wonderful." The energy of arrogance helps the person turn away from God, from the truth, leads him into the opposite direction of one's own happiness, from the joy of doing good, giving the warmth of his heart and making the planet even more beautiful.

The energy of arrogance – it is all that, which turns a person into an ape (an unreasonable person who has lost his mind).

After all, it is unreasonable for some person to shout to everyone that he has a loaf of bread, and he can eat it. Everyone has the same kind of bread. A person begins to strive to achieve what others do not have. But others may not have only that, which has not be invented by God, because initially, God gave everything to all and equally.

Arrogance – it is all, that destroys a person. If a person does not fulfill his purpose on Earth, then he automatically becomes a pest, becomes the energy of disease, because the Earth and the Universe are one. If man is the center of the Universe, then he is the most important link in the life of the planets. And the planets reject this sick energy. Hence the appearance of human diseases. And by force of life circumstances (i.e. injuries, all sorts of

troubles, accidents and etc., "if a brick falls from the wall, then it falls on his head") there is a conversation between God and man. A person who does not want to live by the Divine rules of existence, in this case, living an earthly life, has aspirations to buy a car, to get an apartment or build a house, while cutting down living nature, that is, trees, to earn a lot of money – all of this is needed not for the man himself, but for his selfhood. And when the selfhood grows to a certain size – it kills the person (death). But first there are diseases and problems. This IS the conversation between God and man – through the life circumstances. If a person become aware and changes, will change his life and his aspirations, then he recovers, life will improve.

A person is healthy when people love him, nature loves him, and he loves them – it is harmony of life and a harmonious person.

How is Pride different from Arrogance?

Greatness of man is not in the fact when he is standing on the stage and he is being clapped at, but in that, when thanks to this person others feel joy.

Arrogance – this energy is multi-faced, and it varieties a lot. Selfishness, envy, greed, lust for fame, a desire to stand out somehow among others – this is already disease, that is a person fell under the influence of the energy of arrogance. It is impossible to heal oneself form this disease voluntarily for one reason only – a sick person will never truly understand those people who are telling him about this. This energy has all the physical illness in some way or another, because namely arrogance today does not allow a person to face the truth.

ENERGY OF SELFISHNESS

The energy of selfishness, that is, the thirst for personal enrichment, originally did not exist. Such energy does not exist

in the whole cosmic world on all plains of being and only on the Earth, where people live, there is such energy.

It was artificially created by the people themselves at the time, when they lost their true values, their true purpose, when people due to degradation started to move towards their death, that is, the choice of technocratic path, more precisely, not a choice, but their degradation.

An energy of selfishness grew and acquired the minds of people, and this is supported by your current way of thinking.

If you put a glass of pure water in front of a person and a piece of pure gold, then the person will choose the gold object, which actually happens. Purity of the surrounding environment is pushed to the background, the second or even the third place and the amount of money, material benefits – is put on the first place.

For today it is really the most destructive energy, because it does not allow a person to relax, to look at the world in a different way. After all, the energy of selfishness – this is also envy, among other things. The energy of selfishness and arrogance nourish each other, they stand side by side.

A selfish person gradually removes himself from the Creator, he suffocates, extinguishes in himself the spark of God. And without the spark of God a person becomes in the likeness of an animal, he is not a creator, he – is a consumer, that is, he can not be called a man. This is a complete degradation of all the bodies of man (that is, his subtle and physical bodies).

Manifestation of the energy of selfishness in man: the cardiovascular diseases; legs start to hurt; stomach; liver; pancreas; hair loss; psoriasis; fungal diseases; psychological depression and others.

When the energy of selfishness reaches the strength of destruction – the Universe rejects the person, or rather, the person himself rejects the Universe. It will be difficult for such a person to reincarnate – they will disappear from the Earth, these people.

Diseases of the body means that God still loves this person and warns him. In the future such a person is subject to complete decay, and will be used for the building of the Universe and the Earth, his energy. He will no longer be subject to incarnation.

If the person realizes, that there is such an energy in him, and it is bad, then this person has almost recovered. All that remains for him to do is to confirm this at the physical level, that is to create a new direction, a vital direction in thought.

For example, devote yourself to ecology, forest restoration and orchards. Complete understanding of black energy and his kind deeds on the Earth will clean him up - he will create himself as the energy of creation and life.

Disease passes, when a person realizes and changes this energy in himself on the subconscious level (because of which his is ill). It's not so easy - to change everything on the subconscious level.

In time, you will learn, especially your children.

Today, people gradually stop enjoying the possession of money, because the energies on the Earth are changing, another program is activating.

QUANTUM TRANSITION

Quantum transition - gradual, strong, changing energies, changing life priorities and aspirations of people.

The Earth passes into other vibrations.

Change of energies. People who can not accept these energies, will be modified (leaving the Earth).

These energies are pure, Divine, different from today's in kindness, truthfulness, unselfishness, desire to give, not ask. Selfish people who are used to lying will feel uncomfortable, as if this is not their space of habitat. "If a living fish is taken out of water and left out, in the end it will die"

People's bodies will remain in the same form, but their internal filling will completely change.

School "HAPPINESS" will pay a kind service for future people. This school will support and formulate new energies for a new life.

People say, that a quantum transition will happen in 2012, but it is already happening today. Therefore do not be surprised when positive changes in legislation take place for the benefit of new aspirations, moving of people to kin's domains.

THE ENERGY OF THOUGHT AND IT'S USE

Uradon speaks

To properly use the energy of thought, you need to increase its speed, then you will get out from being under the control of the language of vital circumstances: you will not need to receive a sign in the form of trauma, for example, to understand that you are not doing that which you should be. Until then, your thought has no wholesomeness, it is fragmentary, like a "dot-dash". That is why you can not use the thought to the fullest. Thought should go in a solid line. And this requires a certain speed, which you do not have enough of right now.

School "Happiness" will create optimal conditions for children and adults for the increase of its speed. These orchards will play the most important role for the settlement itself: they will balance the energies of the earth and attract the necessary energies of the cosmos, they will create an energetic balance for all the inhabitants of this settlement. The school will unite people's thoughts in the right direction of their future and of their children.

Today's man, due to his inconstant, intermittent thought (that is, torn) will rush from one information to another, because his thought is finite, and therefore not consistent. Therefore, people search for information, find it in different books, but this

information is always different from each other, there is no clear sequence. But never in any book any teacher or teaching, even the most famous, will give a person anything but questions. Because these questions are born not in the mind, but in the soul, this is affected by genetic memory. This can only be answered by himself, when he feels himself to be part of the Universe, and this will happen when a person will begin to love living nature. In this way he will awaken the thought of the Creator in himself.

The thought of man - it is man himself. As he thinks, so he will live. Let there be no deception in your thought, for by deceiving someone, you are depriving yourself of the truth. The pure thoughts of man will be the decisive factor in the construction of his happy life. This thought - is the only true one, it has a continuation and goes into Eternity. All the rest bear disharmony, and therefore they will die, giving way to a new life.

To create a harmonious space where the energy of Love lives, you do not need to build a house in your thoughts, for the house is needed by your body. A person who started the construction of his kin's domain with a house, does not harmoniously create his own space.

If this is a young person - he must first mentally settle his family there, which he is going to create. Namely for this he is building the Space of Love. In this case, all this Space rushes and creates favorable energy on Earth and in the cosmos, so that this desire in man is accomplished. For the thought of man is the determining factor in his joyful or woeful life. The family is the energy of Eternity, it is the continuation of the Kin, it is harmonious, for such was set up by the Creator - life never stops.

It is necessary to direct the thought to happiness. And happiness - it is fragrant orchards, flowering meadows, birds singing, a smile of a loved one, children's laughter - this is real happiness, not imaginary, and this a person is able to achieve.

Today's creators of kin's domains seek first of all to build a house.

Namely this is considered to be a sign of a properly constructed thought of man, but in fact it is a profound error. It is better to start with growing of your orchard. The house can be small, and you do not need a lot of things, dishes, furniture. People, who are trying to build a big house, are a short-lived energy, this is the energy of yesterday, today such energy is not viable. Such people will not feel comfortable on their hectare.

The world is accumulating new energy. People with new thinking will be able to exist in it, people who build their happy life, conforming and taking into account, that is, helping to build a happy life for their neighbors.

The wheel of civilization of Aryans is gaining the required speed of its harmonious rotation. To date, it is this civilization, which includes such kin as the Veds and Russes, begins to wake up. This process is irreversible. Such was conceived more than ten thousand years ago. Our presence on Earth, that is, dolmens, guarantees you the right development and the beginning of the revival of what was destroyed. We are several thousand, and we have saved everything that you once owned. And without this, there will never be harmony.

WHAT ROLE DO ORCHARDS PLAY FOR A SETTLEMENT Uruslan speaks (Knowledge about the Universe)

What is a fruit orchard? It's beauty, fragrance, pollen, it is the fruits. What is a settlement? These are several families, who created their kin's domain. Each domain - it is a separate orchard, created by those people who live there. Each person plants trees in his own way. He draws his living picture of his space. All this is done in the name of happiness and love, in the name of the song, beautiful song in the Universe - song of the human soul.

Why do we recommend starting a settlement with the school

"Happiness"? Because it is orchards and groves, these are energies, a complex of energies that reinforce and complement each other. In fact, such a school possesses a powerful essence which has a beginning and an end. This energy is viable, it is creative. The Earth, and therefore that village will have a great energy in terms of creation, it will be easier for a correct Divine thought to form, a correct path of development of this village. Children and adults, who have passed these energies through themselves, especially children in ten to fifteen years of education will possess colossal information, such clear, wide range of thinking that they can put forward proposals for the development of their village, for the development of that region where they live and for the whole Earth. It will be concrete, clear, specific and understandable actions, because they will have sufficient knowledge to regulate the energy of the Earth, the people living on it and the cosmos. Already your children will begin that big deed of returning to the Earth all of that which she once possessed.

I want to appeal to those who are starting the construction of the villages not with the thought of a happy life, but with the thought of saving money. In this case, priority is given to money, not to your own happiness. For some reason, people think that they have only one wealth, that is, money, and the energy of Love and your own happiness is moved to the second place. You were very deceived when you were convinced that money – it is happiness. But real happiness – it is God and everything that has been created. And everything that is created by those who do not love God are all for trouble, grief and money too.

Money needs to be used in building your own happiness. They must serve you, and not you them. Never start building your settlement, for example, with a sawmill or business organization. Yes, of course, it is more profitable, and monetary costs are reduced, but such people will not be happy, they put money on the first place, moreover, such people create an energy of destruction. Such energy

will gradually become obsolete from the Earth, for the time of creation has come, in other words it's time to plant trees, and not cut them.

How to use the technocratic world in the creation of the Space of Love

The technocratic world can be used to create of the Space of Love, but very thoughtfully and carefully.

The excavator can be used to create a pond, having previously explained to the earth what you want to do and for what it is necessary, namely, a pond is necessary for a harmonious life of plants on your plot. The top soil after the use of the excavator needs to be restored. The top soil of the earth – it is not only a fertile soil, this is a special microclimate of the earth, enabling all plants to grow. Top soil – it is such energy that harmoniously separates the inner life of the earth and the outer, that is, that environment, in which you live. And the health and life of the planet depends on the quality of the upper layer of the earth. We do not recommend turning the soil with a tractor of the whole plot of your kin's domain, for in that case you will destroy Divine harmony.

Without violating anything, bring your vision to this land, harmonious refinement, and your sincere Love will allow this space to sing its happy song for the Universe. It is thanks to this Song that Man is the creator.

A space where people's thought aspires towards the productivity from the land (that is, a large crop of vegetables and fruits), for extraction of profits from the land and the use in a large volume of the technocratic world, carry great deal of damage to Divine nature, for the excavator, the tractor is not a part of God design. Technology should be used very thoughtfully to facilitate physical human labor, for example, to dig a wide and deep pond. But before

that, explain everything to the earth what you want to do, for even a metal garden tool brings stress to the earth. And it is better if you touching the ground with your bare hands, calm the earth and explain to her what exactly you want to do. And this is very important, because the earth is alive and loves you. When she realizes that you do not want to harm her, and that you love her - she will change her energy on that plot, in turn, will give you her love.

The land, that you call a kin's domain, is different from any other land in that it is both a mother and a child for you at the same time: like a mother she feeds you and protects your calm, and like a child - when you take care of it and protect it all the time, as your little child.

The energy that comes from the earth into his space depends on the person.

The mane mistake of those people who want to collect bigger harvests in their domains, such aspiration is the ignorance and practicality, not inherent to people in the likeness of God, but to those who have lost the spark of God, those people are called biological robots - those who have placed their own flesh above God and only care about it alone. But we say to you: do not seek a big harvest, for soon knowledge will come to the Earth, which will allow people, without eating the foods, to become full, and if you do eat, then a small portion of it. It is enough for man to eat one apple and he will be full for half a day, or a whole day, and the whole riddle is in how to grow such an apple. And it will depend on the internal energies of man. With his own Divine energy - which only man has, that is, not a biological robot, he will be able to grow such fruits. Already your children will start doing it, and the school "Happiness" will help them in this. But if you will aspire, to take a lot of harvest from a small plot of land - this path provides further degradation, to stuff the body with food, and sell the surplus and raise money from it. What is the point of you

creating a kin's domain? Such a person can be called a farmer, and his domain – a factory for the production of foods, this has nothing to do with the Space of Love.

If the soil is infertile, but you chose this land for your kin's domain – there is a horse, and you can plow the ground that is to be used for a vegetable garden. A horse produces a great fertilizer, but, of course, plus your love – it solves everything. And you will have plenty of vegetables and fruit. And the mind in such matters needs to be used, and you need to water the plants, do not be lazy and fertilize the land, and every day caressing her with attention.

Believe me, she will answer you with an abundance of fruits. Today it is so, today you are such, and yet your thought you should direct towards great creations, otherwise you yourselves deprive yourself of the opportunity to create the great. Today you are not Gods, but mentally strive towards the Divine deeds and creations, and each one should decide, what it is.

What is a horse and what is a car

A horse – it is a living creature, created by God. It gives birth to that which is in the likeness of itself, that is, it can multiply, it eats what grows on the ground, on the land it is an irreplaceable assistant. It is a means of transportation, it is a producer of fertilizer for your garden. A horse can plow the earth, transport goods and so on.

Communication with a horse helps a person to be in good spirits, supports the internal balance. This is communication with the living Divine thought. By leading such a life, it is easier for man to understand nature, find your place on the earth, look at the stars in another way, understand the harmony of earthly life, see the earth as the nourisher of all life and of yourself, see all the inhumanity

and idiocy of the technocratic way, will help a person realize how perfect and beautiful planet Earth is, to see the depth of your life and understand the responsibility for the health of the Earth.

The car is made by degraded people from the body of the Earth, that is, from metal. With such things, it is better for a person not to communicate. Everything, which is created by the mentally disturbed mind, will only create a mentally disturbed mind.

Automobile – it is the degradation of mankind, and communication with it, that is, using it on the land, brings only one thing – further degradation to this person. The car moves by gasoline, which is made from oil.

Oil – it is a derivative of the thought of the Earth and the thought of God. When God created the Earth as a living planet and all the rest, he so constructed his own thought, so that all that is created, in this case, the Earth, completed their perfection and a harmonious life with the whole Universe themselves.

After all, everything that is created by God, has an intellect and can think. When the Earth began to think – there appeared a dark, thick liquid inside it. Namely the oil is the connecting link between all organs of the Earth. The oil also responds to changes in the cosmos, and also through the oil, the Earth itself sends signals into the cosmos. Oil mainly consists of water – that which is inherent to planet Earth, the remaining elements – are the materialized Divine thought. That is why, your scientists can not create an artificial gasoline. On the Earth there are no other components except for water and a few others.

You can not dig the Earth, drill it and extract anything at all from it, including oil. It is very bad, that the oil is burning, that is petrol engines. You are burning the mind of the Earth, its harmonious coexistence with the other planets.

A smoky Earth. If only you could understand all the terrible savagery of this fact!

SALE OF THE EARTH

Arkaz speaks (Knowledge of the Earth)

The Earth - it is our Mother in the most complete, present sense of the word. This is really so, for here we are born, and our flesh consists of everything from which consists the Earth. She - is our nurturer, nourisher and she gives us happiness, life in joy, filled with harmony.

If a person is able to sell everything that feeds him, that gave him life, and fills this life with merriment, the dignity and meaning of existence - one can not find a more terrible, more malevolent man than that, he finds gain even in maternal love. Such a person is guaranteed never to be embodied on planet Earth, because he sold it, he chose the money, and the Earth he rejected. He can incarnate on the planet by the name of "Money", but there is no such planet and never will be for this is disharmony. His soul will be used for the construction of cosmic bodies, including the the Earth. And even those who gave birth to such a person, that is, his Kin, will work off the evil deeds of their representative.

Never profiteer with the land. And if you bought land and are going to another place - do not sell it. Sell the buildings, a house, a bunya, a barn, but the land itself just give away, do not take money for it.

You can buy the land, it's unequivocal.

If you bought a plot of land, and then decided to give it up, it will be better if you do not take money for it, this is not an object of sale-purchase. The money that you spend - you can take back, but you should not make money on the sale of the land. Well, and ideally - avoid selling the land.

The Earth - it is the Mother, and if a person is able to sell his mother, then such a person no longer exists on a subtle plain. Why is Lenin in the mausoleum? Why is he not buried in the

ground? Because the earth does not accept him. Being a resident of Russia, the forces of evil involved him in their actions, and through him, as a person, Russian lands have been bought for large sums of money. He sold Russia as a representative of Russia, being its citizen. On the subtle plain this is sufficient, it is not even necessary to be head of state. Through his hands flowed a great amount of money (in the form of bribes and so on), with which the Russian land was being bought. He, as an energy can not be placed into the bosom of the earth. He sold his mother with such hatred, with such greed, that under any regime, existing in Russia, he will lie in the mausoleum or in some place, but not in the ground. His relatives can fix this, but they need to "pray", as you call it, for a long time and with this redeem Lenin. That is why Lenin does not have children this is directly related to his deeds.

The most terrible thing that can happen to a person for his further destiny is for him to sell the earth, because the Earth – it is the Mother, and with this everything is said. Give away the land. And sell the house.

It's like Judas, who sold Jesus Christ.

Jesus Christ, with himself symbolized eternity, life, love, and Judas sold it all for thirty silver pieces and ceased to exist on Earth.

With this action it was shown to everyone – do not sell the truth, preferring illusion. Money – it is the illusion of life, this is a lie. The Earth – it is the truth, that is, the physical life that provides a physical life for every man. This is a Mother. Take care of her!

A person who committed such a mistake, can correct it. In the new place, where he lives, let him plant trees, he should tell this space and the trees, what he realized, and let him plant, and help others to plant trees, and not ask for anything in return.

This will work and ease his guilt. If the person had realized it, the Universe accepted his information – he will receive forgiveness.

PURE MIDNED ENTREPRENEURSHIP

Pure thoughts and the trivial, purposeful earning of money have nothing in common. When a person simply earns money - this is not an entrepreneur in full sense of the word. It's just that money - it is a yesterday. Money for the sake of money - it's gone, low and unworthy of children of God. Such people will soon be laughed at, they will be treated as mentally ill people, mentally underdeveloped beings, in one word, squalid, devoid of intelligence. Before mankind are appearing completely new opportunities, and therefore goals. New goals must be solved in a new way. This newness will be born in your hearts, in your minds.

On you, those living today, directly depends your own future. No one will create it for you. On Earth begins a fundamental change in the way of life. Direct proof of this - is your desire to do business in a new way. You are no longer satisfied with old stereotypes, you begin to worry about the future of the planet, the future of the people.

Know: the earthly energies and the meaning of existence of people will change on a cosmic scale. All that created the money and their strength, will be turned outward by a rotten boil.

People will remove the "dark glasses", and then they will clearly see all of that insolent, cynical lie into which they were plunged, that is the presence of religions, the presence of rich and poor, sick and healthy, happy and sad, lucky and the unlucky. People will be able to understand why there are wars. Humanity will begin a period of recovery.

Catastrophes of planetary scale were avoided.

The powers of light have shown wonders of wisdom, and nothing else remains, other than the movement to knowledge of pristine origins, and therefore, to universal joy and happiness.

It is not necessary to take money out of use forcefully.

Money alone can not do anything, only a person can raise their importance or reduce it. In reality man decides everything and the energies which are in him. For example, the energy of greed, it guarantees only one thing - a complete disharmony in a person's life. The future of mankind will be completely settled and will regulate all of its energies. For this, it is necessary to return knowledge of pristine origins. Without them, never will the Divine plan reign on Earth. If you know - then create for yourself, if you do not know - then you work for those who know more than you. Create schools "Happiness" - it is orchards, flowers and herbs. All this was created by God. In this space, children's thinking energy can develop with the greatest power. This is the real return of knowledge of pristine origins.

Why did they begin to clone trees, plants and so on? In order to remove the thought of God. Why are children taught in special buildings, and they are taught by specially trained people? In order to remove the thought of God. Why are they always implementing different kinds of teachings? To remove the thought of God.

We are, your ancestors, foreseeing all this many thousands years ago, went into dolmens to preserve knowledge of pristine origins - the truth, that is, the thought of God.

* * *

*The future - it is the songs
Of a pure and simple soul,
The future - is when the two are together,
May their dreams come true.*

*He who builds a beautiful life -
He, whose thoughts are pure,
So that the young man in love would try
To grow orchards for his beloved.*

*To make the sun shine brighter,
So that flowers would grow for all,
So that with a real smile
A new face of the Earth was illuminated.*

*There is no more room for cynicism,
There is no place for cold lies,
Because on Earth
You were born, whose thoughts are pure.*

In addition

In the village of "Radosvet" of the Sverdlovsk Region, was the first Gathering of pure minded entrepreneurs, whose goal was the words of Anastasia from books of V. Megre: "The very union, a spiritual contact, namely SPIRITUAL, such people, as entrepreneurs, is a beneficial response of a universal scale. The rest does not need to be dictated. The further itself will indicate the way, will set priorities in everyday events".

It was bound to happen sooner or later. To the Gathering came about seventy people with the goal namely of uniting and a

spiritual communication of entrepreneurs. The beginning of collective mental energy in the pure minded entrepreneurship was laid.

Thought was born, it will acquire new thoughts and the wishes of people with a pure soul, of people who want to create goodness on Earth, people, who understand the words of the Spirits of Dolmens: "Monetary wealth and material well-being is of yesterday, this aspiration becomes dangerous for people's lives. The earth passed the equator of the forces of destruction, to the first place comes kindness, cordiality, the desire to help the Earth, nature, people - this IS pure thought."

At this Gathering, an appeal was made to the entrepreneurs. from the Spirits of the Dolmens.

AN APPEAL TO PURE MINDED ENTREPRENEURS

Uruslan speaks

You have gathered, in order to jointly start a business on the Earth, this is not new, but so rare today. You are returning the pure Divine energies, the energies of creation, of kindness, the warmth of your hearts.

The fact alone, that you are going to gather for this, already means, that the future exists, and not any future, but a happy one where the songs of eternal Love sound.

I'll give you one small piece of advice. But for the entrepreneurs of the future it will be the main condition for their successful activity. Without this condition real success in such activities can not be achieved. If for right now there is still an old inertia working, then in the future the energy of the Earth and energies, associated with the life of the planet, will change so much that such energy, as the thirst for profit, that is, selfishness, will become unviable, for such an energy there will be no life on the Earth.

Here is this advice:

Your first thought in your business should be selfless.

Let your second thought count the money and so on, but let the first thought aspire for the benefit of the earth, forests, water, air, that is nature, for the benefit of people, your neighbors, like-minded people and just people, etc.

I am telling you with all responsibility: the future begins with the pure minded entrepreneurs. After all, an entrepreneur - it is not necessarily the person, who earns a lot or little money, an entrepreneur - it is a person who specifically, and not in words, does something, and the purity of thoughts determines the actions of man.

Do not link your well-being only with money. This is a sneaky trap. Because any crisis or a monetary reform will make you poor in one night. Learn to understand that the true happiness of you and your children - THAT's the real wealth. The amount of money can not guarantee a calm and happy life.

You are beginning to create the wonderful future of the Earth and of all mankind as a whole. These are not empty words, you are allowing the beginning of that thinking energy, which in the near future will be predominant and defining in the relation of people. Do not be discouraged, do not lose faith, having met lack of understanding or mistrust, continue what has been started. It's always difficult to the first ones. Believe me, those people will come who are looking for this energy - the energy of purity and kindness, that is, harmony.

*Open your eyes more quickly,
Create this beautiful life,
Only your pure hearts
Will warm up your dear planet*

* * *

*Russia did not fall in selfishness and deceit,
And the pure soul did not sell out,
Time of vile deception is passing,
The time comes of a joyful day.*

*I see the bright face of my Russia,
I hear the step of the Heart,
And in the universe new Messiahs are born,
And Mother Earth blossoms.*

*It is impossible to defile, to mess up the holy,
And it's impossible to put out the dawn,
We will not forget the past,
We will return to a happy time!*
